

Vineet Sharma

Automation Architect | Playwright | GenAI-Driven QA | CI/CD Leader

SUMMARY

Automation Architect with **15 years of QA experience**, including **10+ years in automation** and **3+ years in Playwright**. Proven expertise in building scalable test frameworks across **Healthcare, Banking, CRM, and eCommerce domains**.

Specialized in **Playwright (JavaScript), Selenium, API automation, and CI/CD pipelines**, with strong focus on **AI/GenAI-driven testing**—leveraging LLMs to automate test generation, enable self-healing frameworks, and accelerate QA delivery.

SKILLS

Automation & Testing

Playwright, Selenium, RestAssured, Cucumber (BDD), TestNG, API Testing

Languages

JavaScript, Java, Python

CI/CD & DevOps

Jenkins, GitHub Actions, Docker, AWS

Test Management

Jira, Xray (Cucumber integration), Agile

AI / GenAI in QA

Prompt Engineering, AI Test Case Generation, NLP Validation

Tools: ChatGPT, Gemini, Copilot, GPT-4, Agentic AI

Database: SQL, ClickHouse

EXPERIENCE

Automation Technical Architect (Quest Diagnostics – Healthcare Domain)

HCL Technologies | Jan 2025 – Nov 2025

- Architected **Playwright + Cucumber automation framework** for healthcare workflows (lab/reporting systems)
 - Designed and implemented **CI/CD pipelines** using GitHub Actions with parallel execution
 - Integrated **Xray + Jira + automation pipelines** for real-time traceability
 - Built **Grafana dashboards** for QA insights and reporting
 - Leveraged **AI (Copilot, Agentic AI)** to reduce script maintenance and improve efficiency
 - Defined automation strategy and best practices across teams
-

Automation Specialist

360Degree Cloud Technologies | Mar 2024 – Oct 2024

- Designed Playwright (JS) BDD framework from scratch for Salesforce CRM
 - Automated CTI, SMS, and VOIP workflows
 - Implemented Docker + Jenkins pipelines for scalable automation
 - Defined automation strategy and improved test coverage
 - Applied AI-driven techniques to reduce manual scripting effort
-

Automation SDET / Specialist

Iris Software | Sep 2019 – Mar 2024

- Led automation for **Citi Bank applications (eKYC, CDM, Credit Risk/FM)**
 - Built **Playwright & Selenium frameworks** integrated with Jenkins CI/CD
 - Enabled **parallel execution frameworks**, improving release cycles
 - Conducted **POCs and client demos** for automation solutions
 - Applied AI/ML-based approaches to enhance automation
-

Senior Test Analyst (eCommerce Domain)

VServe Business Solutions | 2019

- Automated UI + API testing using Selenium & RestAssured(For BedBath & beyond)
 - Built BDD frameworks and integrated with CI/CD
 - Supported cross-browser and responsive testing
-

Test Lead (Healthcare Domain)

Cignex Datamatics | 2018

- Defined QA strategy for healthcare benefits platform (For Alight Solutions)
 - Led QA team ensuring data accuracy and workflow validation
 - Executed manual and automation strategies for critical systems
-

SDET / Module Lead (SaaS & CRM Platforms)

3CLogic Technologies Pvt. Ltd. | 2009 – 2017

- Defined QA strategy for call center and SaaS platforms
 - Built automation frameworks using Selenium, TestNG, Cucumber
 - Automated CRM integrations (SalesForce, Zoho, ServiceNow)
 - Developed API automation (RestAssured, JSON/XML validation)
 - Delivered 500+ automated test cases across applications
 - Led onboarding, QA planning, and integration testing
-

GENAI PROJECTS

AI-Powered Autonomous Test Automation Platform

Tech Stack: Python, LangChain, LangGraph, OpenAI API, MCP, Playwright, Vector DB

- Built an autonomous testing system integrating LLMs with automation frameworks
- Implemented Model Context Protocol (MCP) for tool and data integration
- Designed multi-agent workflows (LangGraph) for test generation, execution, and validation
- Used LangChain for prompt orchestration and memory handling

Key Features:

- Auto Test Case Generation from requirements
- Self-Healing Automation (dynamic locator fixing)
- AI-driven execution & failure analysis
- Smart reporting with root cause insights
- RAG-based validation using embeddings & vector DB

Impact:

- Reduced test creation effort by ~40–50%
 - Improved test stability and reduced flaky failures
 - Accelerated QA cycles with autonomous workflows
-

KEY ACHIEVEMENTS

- Built multiple automation frameworks from scratch (Playwright & Selenium)
 - Implemented AI-driven test generation frameworks
 - Enabled parallel execution + CI/CD, reducing execution time significantly
 - Delivered real-time QA dashboards (Grafana, Xray)
 - Recognized with multiple awards for automation excellence
-

EDUCATION & CERTIFICATION

- M.Sc. (IT), Punjab Technical University
 - BCA, IGNOU
 - ISTQB Certified
-

DIFFERENTIATOR

Combines 15 years of QA expertise with cutting-edge GenAI capabilities, delivering intelligent, scalable, and future-ready automation solutions.
