

PRASHANT RATHORE

UI/UX DEVELOPER

EXPERIENCE:

SENIOR ENGINEER

CITI BANK (CONTRACT)-USA

2018 – PRESENT

- Designed and developed modern, responsive user interfaces using HTML5, CSS3, JavaScript (ES6+), and React.
- Built scalable single-page applications (SPA) using React with component-based architecture and reusable UI patterns.
- Integrated frontend interfaces with Flask/Django backends by working with routes, views, RESTful APIs, and Jinja2 templates to enable seamless data flow and functionality.
- Optimized web applications for high performance, fast load times, and scalability using efficient rendering, caching, and code-splitting techniques.
- Ensured cross-browser compatibility and responsive behavior across modern browsers and devices through rigorous testing and adherence to web standards.
- Translated UI/UX designs from Figma/Adobe XD into high-quality, production-ready code.
- Develop dynamic, data-driven interfaces by connecting UI components with backend services and APIs.
- Implemented state management in React using hooks, context API, and modern patterns.
- Ensured cross-browser compatibility and responsive design across mobile, tablet, and desktop devices.
- Optimized web application performance through lazy loading, code splitting, and efficient rendering techniques.
- Collaborated with backend engineers to design and consume RESTful APIs for seamless data flow.
- Built and maintained reusable UI component libraries to improve development efficiency and consistency.
- Applied best practices in UI/UX design to enhance usability, accessibility, and user engagement.
- Worked with Flask/Django routing, views, and templates to deliver full-stack features end-to-end.

- Integrated authentication and session management between React frontend and backend services.
- Utilized Git (GitHub/GitLab) for version control, branching strategies, and collaborative development workflows.
- Participated in agile/Scrum processes, including sprint planning, daily standups, and retrospectives.
- Debugged and resolved complex UI and integration issues using browser DevTools and logging techniques.
- Implemented form validation, error handling, and user feedback mechanisms for improved user experience.
- Supported deployment processes and environment configurations for cloud platforms such as GCP.
- Improved application performance and scalability by optimizing API calls and reducing unnecessary re-renders.
- Ensured secure frontend-backend communication following best practices for data handling and validation.
- Collaborated closely with designers and product teams to iterate on UI improvements and user flows.
- Maintained clean, modular, and well-documented code following industry standards and best practices.
- Demonstrated a full-stack mindset by contributing to both frontend development and backend integration.
- Enhanced UI responsiveness and interactivity using modern CSS frameworks and animations where appropriate.
- Assisted in deploying and monitoring applications in cloud environments with a focus on reliability and performance.
- Implemented service discovery, load balancing, API gateways (Eureka, Ribbon, Zuul), and circuit breaker patterns (Hystrix, Resilience4j) for fault tolerance.

APPLICATION DEVELOPER

SSC / ATOS

2014–2018

- Developed enterprise-grade web applications using Java (J2EE), REST APIs, and modern UI technologies

- Designed scalable backend services and integrated with frontend applications for seamless data flow
- Developed single-page applications using React.js (early versions with class components) and JavaScript (ES5/ES6)
- Built responsive web interfaces using HTML5, CSS3, and Bootstrap with focus on cross-browser compatibility.
- Created reusable UI components following component-based architecture principles
- Managed application state using Redux and implemented predictable state management patterns
- Implemented client-side routing using React Router for navigation across multiple views
- Integrated frontend with backend systems using RESTful APIs, handling JSON data and asynchronous calls
- Worked with AJAX/Fetch and early promise-based patterns for API communication
- Used Webpack and Babel for module bundling and transpilation of modern JavaScript.
- Optimized performance by minimizing re-renders and improving component lifecycle usage
- Performed DOM manipulation and debugging using browser developer tools
- Wrote unit tests using Jest/Enzyme (early React testing tools)
- Ensured basic application security and input validation on frontend forms
- Worked on SQL Server and Oracle databases, optimizing queries and stored procedures for performance
- Implemented authentication and authorization using secure enterprise standards
- Collaborated in Agile teams, delivering high-quality software with CI/CD practices
- Enhanced application performance and maintainability through refactoring and modular design

SOFTWARE ENGINEER

PICON INFOTECH PVT LTD

2007–2014

- Developed Rich Internet Applications using Adobe Flex (ActionScript 3.0) with interactive UI components and enterprise workflows.
- Built backend systems using Core Java, J2EE, and REST/SOAP web services
- Designed and implemented RESTful APIs for frontend-backend communication
- Worked extensively on MVC architecture, reusable components, and modular design

- Developed data-driven dashboards, grids, and reporting tools
- Integrated Flex applications with Java backend services for enterprise systems
- Optimized SQL queries, database schemas, and stored procedures for performance
- Gained strong expertise in object-oriented programming, design patterns, and enterprise architecture
- Worked in Agile and Waterfall environments, delivering end-to-end solutions.

SKILLS:

- JavaScript (ES5/ES6+)
- Java (J2EE)
- SQL
- HTML5
- CSS3
- Bootstrap
- React.js (Redux, Hooks, Context API, React Router)
- Flask
- Django
- REST/SOAP APIs
- Jinja2
- Jest
- Enzyme
- Git (GitHub/GitLab)
- Webpack
- Babel
- GCP
- CI/CD
- SQL Server
- Oracle
- Microservices (Eureka, Ribbon, Zuul, Hystrix, Resilience4j)
- Agile/Scrum
- UI/UX (Figma, Adobe XD)

EDUCATION:

MASTER OF COMPUTER APPLICATIONS (MCA) – Computer Application Rajiv Gandhi Prodyogiki Vishwavidyalaya | May 2007
