

Sachin Gupta

QA Lead | SDET | +91-9785142195 | er.sachin27@gmail.com

PROFESSIONAL SUMMARY

- Strategic professional with 13+ years of experience delivering end-to-end Quality across Banking, BFSI, FinTech, E-commerce, ERP (SAP), Wealth Management mutual fund and Automobile domains. Web, Mobile (iOS/Android), and Desktop applications including specialized environments like **Salesforce**.
- Manual Testing & Shift-Left Advocacy:** Expert in driving the full manual testing lifecycle with a Shift-Left mindset, engaging in early requirement analysis to prevent defects before development. Dedicated to maintaining 100% requirement coverage through meticulous Test Plans, Exploratory testing, and rigorous RTM management, ensuring zero-leakage deployments.
- Test Automation & API:** Expert in architecting hybrid frameworks using Java, Selenium, Appium, and Rest Assured, consistently reducing regression cycles by 70%. Proficient in backend API validation with Postman and performance testing via JMeter.
- AI Validation & LLM Testing:** Specialized in validating Large Language Models (LLMs) through automated data validation and prompt evaluation. Expert in verifying model accuracy and reliability by measuring Precision, Recall scores to ensure high-fidelity, consistent model outputs.
- Leadership:** Led and mentored cross-functional teams of 12+ professionals, driving technical training programs and aligning QA roadmaps with high-level business objectives.
- DevOps & CI/CD:** Expert in integrating automated quality gates into GitHub, Jenkins, and Azure DevOps pipelines to accelerate mission-critical, high-scale delivery cycles.
- Strategic Leadership:** Managed and mentored cross-functional teams of 12+ professionals, driving technical training programs and aligning QA roadmaps with high-level business objectives.
- QA Process Leadership & Setup:** Expert in setting up and standardizing end-to-end QA processes from the ground up. This includes defining test strategies, selecting tool stacks, establishing frameworks, and implementing best practices to ensure scalable and repeatable quality excellence.
- Management Perspective:** Acts as a bridge between technical execution and business value, providing data-driven quality insights and resource optimization to facilitate informed, risk-mitigated release decisions.

TECHNICAL SKILLS

- Programming Languages:** Java, Java Script
- Test Automation:** Selenium WebDriver, Appium, Rest Assured, Playwright
- API Testing & Performance Testing:** Postman, SOAPUI, Swagger, JMeter
- Cloud & Infrastructure :** Google Cloud Platform (GCP Logs), Azure Cloud, Grafana Monitoring, Apache Kafka (Event-driven testing).
- DevOps and CI/CD:** Maven, Jenkins, Azure DevOps, GitHub
- Test & Project Management:** JIRA, QC/ ALM, Mantis BT, Microsoft Azure, Test Link
- Databases & Middleware:** MySQL, Oracle, MongoDB, PostgreSQL,
- AI & Next-Gen Tech:** Generative AI (GenAI), Agentic AI, LLM Validation (Precision/Recall), Prompt Engineering, MCP, Landing AI (OCR), HITL (Human-in-the-Loop).
- Enterprise Platforms:** Salesforce, SAP (MES/MII), FASTag/NPCI Payment Gateway.
- Domain Expertise:** Banking, Financial Services, E-commerce, Travel, Mutual Funds, and Payment Services (FASTag/NPCI), Wealth Management, Mutual Fund FinTech, ER, Healthcare.
- Leadership:** QA Process Setup, End-to-End Strategy, Team Management, QA Strategy, Risk Analysis, Resource Planning, and Stakeholder Communication.

EXPERIENCE

Capgemini India Pvt. Ltd.

QA Lead| Aug '21 – Present

Projects-

- AI-based Compliance or Document Verification System** - Developed and implemented an automated compliance verification framework to validate Batch Manufacturing Records (BMR) against a Master Template. The system uses AI/ML to detect anomalies in handwritten and printed data, replacing traditional manual verification in highly regulated environments.
- Salesforce-based Digital Loan Origination & Disbursement System:** Digital transformation on the Salesforce platform, automating the end-to-end loan lifecycle from application intake to disbursement. The system manages high-scale financial workflows and **MuleSoft-driven** integrations, ensuring strict adherence to organizational mandates and government financial policies.
- Load Chart & JBCE (Client: SLB, USA):** Oversaw quality assurance for time-tracking and bonus calculation engines serving over 1.8 million global employees.

4. **Fintech and CIFA (Claim Initiating file access) – Comcast (USA):** Directed testing for internal travel expense and claim initiation systems
5. **SAP MES TE Project: (Berlin, Germany):** Managed integration testing between MES/MII and S4/HANA for shop-floor control optimization.

Leadership & Technical Achievements

- **Strategic QA Governance:** Defined comprehensive test automation and manual strategies, including resource planning and scheduling across diverse geographic regions and cross functional team.
- **Team Management:** Led the QA team through test plan creation, task estimation, test scripts, framework creation and metric tracking to ensure alignment with sprint goals.
- **Automation & API Architecture:** Engineered robust automation modules using Selenium WebDriver, TestNG, Maven POM, Java, and BDD-Cucumber, integrated with CI/CD pipelines.
- **Performance Optimization:** Developed and executed performance test cases using JMeter to ensure system stability under load, providing detailed reports to stakeholders.
- **Stakeholder Engagement:** Acted as the primary point of contact for client handling, task discussion, and release readiness reporting.
- **Salesforce & Integration Leadership:** Directed end-to-end quality for complex **Salesforce (LOS)** implementations, validation of custom Apex/Lightning components and seamless **MuleSoft** integrations between front-end and banking backends.
- Facilitated resource participation in Scrum ceremonies and task preparation.
- Implemented a Human-In-The-Loop (HITL) module to ensure 100% data integrity by allowing manual overrides for low-confidence AI extractions

Girnar Care Pvt. Ltd. (CarDekho)

QA Lead| Mar '20 – May '21

Projects-

1. **MyTelly:** Managed quality for an intelligent telephony system integrated with sales and support workflows to enhance customer engagement.
2. **Used Car Platform:** Directed testing for vehicle listing, search functionality, and lead generation workflows to improve operational efficiency.
3. **Careline HR System:** Led the development and optimization of modules for employee time tracking, attendance, Payroll creation and shift management.

Leadership & Technical Achievements

- **Multi-Product Governance:** Managed QA activities across parallel product lines, ensuring consistent quality standards and timely delivery in a fast-paced Scrum environment
- **Automation Strategy:** Designed and implemented Selenium WebDriver and Appium automated test cases for smoke and regression suites. Developed a hybrid framework using **Selenium** and **Java** that increased test coverage by 40%.
- **Team Mentorship:** Led both manual and automation teams, assigning tasks, reviewing output, and ensuring alignment with sprint goals.
- Designed a comprehensive REST Assured framework for seamless API-to-UI layer integration, complemented by JMeter-driven performance testing to validate API scalability and response reliability under high load.
- Utilized JIRA for sprint-based test case management, agile planning, and defect lifecycle tracking across multiple product releases.

SA Technologies Inc.

Senior Test Engineer| Feb '19 – Feb 20

Fintech Innovation: Government Project - Tested NETC FASTag toll systems, ensuring secure real-time settlement and integration with NPCI.

Leadership & Technical Achievements

- Collaborated with cross-functional teams in Agile and Scrum environments to improve software quality.
- Involved in automation script creation and execution using BDD Framework with Gherkin in Java, Rest Assured and TestNG.
- API Testing using Postman, SoapUI, and Rest Assured to validate request/response structures, authentication, and business logic.
- Executed comprehensive testing covering toll transactions, payment gateway reconciliation, settlement processing, and RFID tag handling through end-to-end, regression, integration, and UAT testing Test Plan, Test scenario, Test case creation and execution.
- Executed Performance Testing using JMeter to assess system behavior under peak toll traffic conditions.
- Provided L3 Support to investigate and resolve critical production issues related to toll transaction failures, data mismatches, and tag status conflicts.

- Engineered comprehensive test strategies by mapping complex user journeys and maintaining rigorous RTMs to ensure total requirement coverage and high-quality module delivery.
- Managed end-to-end testing lifecycles, overseeing task distribution and mentorship while providing data-driven quality reports to leadership to drive continuous process improvements.

Anand Rath IT Pvt. Ltd.

Assistant Test Lead| Dec '16 – Feb '19

Projects-

1. **Omni Financial Advisor (OFA):** Oversaw quality for IFAs (distributor) software managing client investments, portfolio valuations, and SIP details
2. **Digital Wealth Management (DWM):** Managed testing for investment-advisory platforms, including financial planning and order modules for BSE/NSE.

Key Contributions

- **Efficiency Gains:** Designed and implemented mobile and web automation frameworks using Java, Appium, and Selenium.
- **Compliance & Standards:** Led QA efforts for mutual fund applications, ensuring strict compliance with financial industry standards across mobile and web platforms.
- **Metric-Driven Leadership:** Set up quality monitors for all deliveries and provided actionable insights to stakeholders through key metrics analysis.
- **End-to-End Execution:** Planned and executed functional, integration, and E2E tests for critical financial modules including Onboarding, SIP, Redemption, and NAV updates
- **Tool Management:** Utilized Mantis BT and TestLink for defect tracking and test case management, while authoring detailed release notes for go-live decisions.

Componence Portal Service Pvt. Ltd.

Senior Test Engineer| Nov '14 – Dec '16

Projects – BeatStream, Pogolt, Scram Card, Online Learning Tool

Responsibilities

- Requirement/Change Request Analysis, Support
- Communication with Scrum team
- Test plan, Test Cases, Test script, Execution plan/Test case, Bug Reporting.
- Automation Testing – Appium -iOS and Android
- Executing API Testing - Postman/ Fiddler/ Charles

Tetraskelion Software Pvt. Ltd.

Senior Test Engineer| Jul '12 – Oct '14

Projects – TravelMint, Indian Arts

Responsibilities

- Requirement Analysis with Business Team and Product Owner
- Perform functional testing, regression, retesting, UAT, acceptance, usability and Integration testing
- Writing Test cases, execution, bug reporting
- Tool – Bugzilla, Excel sheet, QTP

CERTIFICATIONS & PROGRAMS

- ISTQB-ISEB Certified Tester Foundation Level (CTFL)
- NCFM - Financial Markets: Beginner's Module
- PSM-1 Professional Scrum Master
- SAFe Scrum Master (SSM) 5.0
- Connect Manager (Howard University)

ACADEMIC CREDENTIALS

Bachelor of Engineering (B.E) – Information Technology
Rajasthan University|2009

PERSONAL INFORMATION

Address: Sector -44, Gurgaon

DOB: 27-Nov-1988
