Date of Birth: 06 April 1988

Objective

Results-driven QA professional with 12+ years of experience in web application testing, including 5 years of Selenium WebDriver automation with Java, 5 years of REST API automation using Rest Assured (Java), and 3+ year in Playwright Automation with TypeScript and Cypress Automation with TypeScript. Seeking a QA Lead, SDET, or Senior QA Automation Engineer role to drive quality engineering initiatives, implement scalable automation solutions, and deliver high-performance, reliable software using modern test practices, API automation, and AI-driven workflows.

Profile Summary

- 12 years of experience in web application testing with strong expertise in manual testing and test automation.
- 5 years of hands-on experience in Selenium WebDriver automation using Java, TestNG, and Maven.
- 5 years of REST API automation experience using Rest Assured (Java), with additional API testing exposure through Postman, Playwright, Cypress, and Robot Framework.
- 3+ year of experience in Playwright Automation and Cypress Automation using TypeScript for modern UI, API and end-to-end testing.
- Strong hands-on exposure to GenAI-assisted automation using Cursor AI and GitHub Copilot, applying Selenium MCP and Playwright MCP concepts for AI-driven test generation, self-healing locators, and intelligent execution flows within automation pipelines.
- Experienced in building n8n workflows integrating AI agents and APIs to automate real-time operational and business use cases.
- Strong understanding of SDLC, STLC, and methodologies including Agile (Scrum) and Waterfall, with CI/CD exposure using Jenkins and version control systems (Git, SVN).
- Proficient in Page Object Model (POM) design, Database Testing (MySQL, PostgreSQL, PL/SQL), and test management tools such as Jira, Azure DevOps, Notion, Bugzilla, and Beetle.
- Microsoft Certified: Azure Fundamentals, with exposure to cloud-based QA and automation solutions.

Technical Skills

Automation Tools: Selenium, Playwright, Cypress, Postman, Robot Framework, Rest Assured

Frameworks & Testing Approaches: Test NG, Maven, Cucumber (BDD), TDD, ATDD

Languages & Scripting: Java, JavaScript, TypeScript, Python, HTML, CSS

Databases: MySQL, PostgreSQL, PL/SQL, MongoDB

AI-Assisted Automation & GenAI Tools: Cursor AI, GitHub Copilot, OpenAI (GPT-4), Prompt Engineering, Selenium MCP, Playwright MCP

Workflow & Intelligent Automation: n8n (Workflow Automation), API/Webhook Integration, JSON Handling, Excel/CSV Automation, JavaScript (Function Nodes)

Cloud Platforms: Microsoft Azure

Version Control & CI/CD: Git, SVN, Jenkins

Development & QA Tools: Eclipse, VS Code, IntelliJ, PyCharm, Jira, TestRail, Azure DevOps
Notion, Bugzilla, OpenSearch (Search & Analytics)

Test Reporting & Analysis: Allure Reports, Extent Reports, TestNG Reports, Mocha Reports

Professional Experience

Applicantz Software Solutions LLP (Client: Autodesk)

Design & Engineering Software

QA Automation Lead

Oct 2025 – Jan 2026

Projects: MFGDM

- Leading end-to-end automation strategy and execution, framework optimization, and overall quality assurance strategy across Autodesk services.
- Designing and implementing scalable automation frameworks with strong integration across UI, API, and data-validation layers.
- Building Playwright-based API automation suites using TypeScript to validate service behavior, request/response flows, authentication, and contract consistency.
- Leveraging Cursor AI to accelerate Playwright API automation development using TypeScript, improving test coverage and enhance maintainability of automation components.
- Developing reusable API modules in Playwright using TypeScript for regression automation, schema validation, observability, and CI/CD quality checks.
- Implementing Postman collections for functional, regression, and contract testing across microservices.
- Integrating OpenSearch for automated data validation, enabling near real-time backend data integrity verification.
- Performing end-to-end API validation for Autodesk OpenSearch modules, ensuring reliability, accuracy, and performance.
- Collaborating with engineering, product, and DevOps teams to define quality gates, automation standards, and improved test coverage.

Pscope Technologies Pvt Ltd

Healthcare, Insurance & Automotive

Senior QA Automation Engineer

Jan 2023–Aug 2025

Projects: R1 RCM, Woodruff Sawyer, ServiceUp & DexCare

- Developed automation frameworks from scratch using Selenium (Java), Playwright (TypeScript), Cypress (TypeScript), and Robot Framework (Python, ATDD), significantly enhancing testing efficiency and software quality.
- Led a team of 4 testers, enforcing coding standards and conducting code reviews for automation scripts.
- Designed and executed API test automation using Postman, Rest Assured with Java, Playwright with TypeScript, Cypress with TypeScript & Robot Framework to ensure robust API validation.
- Automated end-to-end testing for **Woodruff Sawyer (Insurance domain)** platform covering policy issuance, renewals, claims validation, and broker-client interactions, leveraging Selenium, and Rest Assured for UI and API automation, with validations on underwriting rules, premium calculations, and third-party integrations.
- Developed intelligent automation workflows in n8n powered by OpenAI to streamline test reporting, generate real-time business insights, and solve operational challenges.
- Applied Selenium MCP and Playwright MCP concepts along with GitHub Copilot to enable AI-assisted test generation, self-healing locators, and smarter test execution flows using LLMs and automation pipelines.
- Integrated GenAI-driven validation logic into automation suites to improve test resilience, reduce maintenance effort, and accelerate coverage expansion.
- Delivered precise sprint task time estimates, enhancing project planning and ensuring timely delivery.
- Contributed to Agile ceremonies, delivering detailed bug reports and test summaries.

Datamatics Global Services Limited (Client: Morningstar)

Banking & Capital Markets

Consultant

Nov 2020–Jan 2023

Projects: Equity SDC/OPM, DCS 2.0, MEDS & NAPF (In-house Project)

- Developed Data-Driven and Hybrid Frameworks using Selenium, Java, TestNG, and Maven, reducing manual testing time by 25%.
- Automated UI and API test scripts, enhancing regression testing efficiency.
- Validated financial statement data (Balance Sheet, Income Statement, Cash Flow) through the **Standard Data Collection (SDC)** system by testing annotation and mapping of financial data used for investment research and analytics.
- Tested **Debt Controlling System (DCS)** for processing debt instruments such as bonds, debentures, and other fixed-income securities, validating debt ratios and financial leverage calculations.
- Performed end-to-end financial data validation in **MEDS**, ensuring accurate integration of financial datasets from multiple applications for downstream portfolio analysis and reporting.
- Tested and automated financial investigation workflows in **NAPF** application involving SWIFT MT / CAMT payment messages and DEVA communication templates, validating investigation lifecycle, transaction linking, memo generation, and business rule validations.
- Actively participated in Agile user story grooming and sprint planning.
- Executed Functional, Regression, UI, API, and Database Testing, ensuring defect-free releases.
- Implemented Page Object Model-based automation using Selenium, improving script maintainability.
- Validated REST APIs with Postman and Rest Assured; performed Database Testing with SQL in DBeaver.
- Developed and executed TestRail test cases, ensuring alignment with user stories for thorough validation.

Accio**Senior Tester – Development Team**

Advertising
Jan 2020–Sep 2020

Projects: GRAB & VOD

- Built Selenium automation framework using TestNG and Maven, streamlining end-to-end testing.
- Conducted GUI, Functional, Regression, API, and Exploratory testing, ensuring high-quality deliverables.
- Enhanced testing efficiency by developing and executing TestRail test cases aligned with user stories, while leveraging Jira for streamlined defect tracking and developer collaboration.
- Experience in Testing API using Postman and writing Automation scripts to test Rest API In Rest Assured Framework.
- Conducted manual testing for critical features and participated in Agile ceremonies, including sprint planning and retrospectives.

Accelya Kale Solutions Limited**Senior Engineer – Testing**

Travel (Airline-PRA)
Nov 2018–Jun 2019

Projects: Airline PRA Proration

- Performed Functional, GUI, Regression, and API testing using Selenium and Postman.
- Developed and executed Java-based automation scripts in Eclipse, collaborating with developers for bug resolution.
- Strong understanding of Agile (Scrum) and Waterfall software development methodologies.

Sutherland Global Services Pvt Ltd**Lead – CS Phone**

Travel (Airline-PRA)
May 2013–Nov 2018

Projects: Qatar Airways-PRA Proration & Air-Serbia-PRA Proration

- Managed QA for Qatar Airways and Air Serbia PRA projects, leading airline proration validation.
- Built and maintained Selenium TestNG frameworks, guiding junior testers and coordinating with clients.
- Experience in API testing using Postman, including writing test scripts and validating request and response data.
- Experience in executing DDL and DML queries, with hands-on knowledge of writing SQL queries and performing database testing using PL/SQL.
- Utilized Beagle, Amadeus, SIS, and RATD for bug tracking and testing.
- Strong understanding of Agile (Scrum) and Waterfall software development methodologies.

WNS Global Services Pvt Ltd
Associate Operations
Projects: Expedia

Travel (Airline-Audit)
Oct 2012-May 2013

- Performed Fare and Commission audits and conducted quality checks.
- Utilized travel industry tools including Sabre, Amadeus, ARC/BSP, and RATD for fare verification and processing.

Tata Consultancy Services Limited (TCS)
Process Associate
Projects: Hawaiian Airlines PRA

Travel (Airline-PRA)
Nov 2009 –Aug 2012

- Managed Prime and Rejection billing processes, ensuring accuracy and compliance.
- Worked extensively with interline agreements including SPA, MIBA, STA, ZED, ID, and CSA.
- Used tools such as Sabre, Amadeus, ATPCO, and RATD to support airline proration and fare audits.

Education

2008: B. Com, Mumbai University, 58%

2005: 12th, CBSE Board, 64%

2003: 10th, CBSE Board, 68%

Certifications

- **Microsoft Certified: Azure Fundamentals (AZ-900), Feb 2024**
- **Diploma in Advanced Selenium WebDriver with Java, Seed Infotech, 2019-20**
- Diploma in IATA-CONSULTANT, Thomas Cook Centre of Learning, 2012-13

Achievements

- Awarded for USD 400,000 revenue recovery at Sutherland.
- **Recognized for client satisfaction, leadership, and technical excellence**
