

Nandhakumar Lakshmanan

Designing & developing scalable, resilient, robust user-focused Enterprise Applications, driving break-through efficiency

Technology Leader | Cloud Enthusiast | Solutions Architect | Full Stack Developer | Team Builder

📞 +1-312-479-3745 ✉ nandhakumar2005@gmail.com 📍 Illinois, Chicago 🔗 [linkedin.com/in/nandhakumar-lakshmanan-a759068](https://www.linkedin.com/in/nandhakumar-lakshmanan-a759068)

NICHE

- Project/Program Life cycle Management
- Change/ Scope Management
- Onsite-Offshore Coordination
- Requirement/GAP Analysis
- Workflow Analysis
- Product Backlog Grooming & prioritization
- Process modeling
- Designs (High level and detail)
- Code reviews and Effort estimations
- Staffing plan and execution
- Requirement and project Documentations (BRD, User stories, Story board, Use case, Mock-ups, Testcases)
- Product feature tests and Demos
- Agile & scrum/ Waterflow methodologies
- Architecture Review

TECHNICAL FORTE

Programming: .net core (8,9) ASP.Net MVC#.net (2.0, 3.0, 3.5, 4.5, 4.7.2)VB.net (2.0, 3.0, 3.5, 4.5, 4.7.2)

IDE: VS 2022, VS2019 Database: SQL (2008, 2016 and 2019) and Oracle (19c, 12c, 10g)Database jobs: SSIS package

UI Layer: Angular, CSS, Type scripts

Basic knowledge on NO SQL: Mongo DB

Data access technologies: ADO.net, Linq

Web technologies: Web API, WCF SOAP, XMLSource code: VSTS, GIT and TFS

Cloud knowledge : Azure Pipelines: Azure Functions, Azure Event Grids, Data factory, Logic apps, Service Bus, Designed DevOps pipelines, Dockers

Authentications: OAuth, SAML, API, Windows, Claims

PDF generation tools: Aspose, Planet Press Payment gateways: Chase integrations, DocuSign Integration

DOMAIN EXPERTISE:

- Insurance (15+) and Retail (2+)

Executive Summary

- Dynamic, versatile and self –driven Technology Lead stepping forward with 17+ years of experience in building scalable, resilient, secure and robust Enterprise Applications (Cloud native apps and desktop apps) and in integration platforms architecture.
- Migrating applications to Cloud from internal data centers.
- Adroit in using Microsoft technologies with in-depth knowledge and experience in Insurance industry.
- Committed to helping organizations achieve maximum benefits from their IT investment by actively engaging in all stages of SDLC from soliciting requirements of customers, followed by building business cases, evaluating customer priorities, training and mentoring high performance teams, removing impediments and backlogs, enhancing velocity of operations to driving service delivery excellence.
- Commended for ability to transcend barriers between technology, creativity and business, by aligning and engaging effectively with key stakeholders. Nimble in the adaptation of new technologies to quickly develop required Proof of Concepts (POCs) with production level standards and influence technology choices.
- Proficient in building Cloud Native Solutions using scalable cloud services with Hybrid Cloud Architectures, Kubernetes Infrastructure and Secure Cloud Services.
- Key player in knowledge transfer exercises and process documentation.
- A true self-starter, problem solver and a big picture thinker with excellent communication skills.

Career Highlights

- Recognized as an Exceptional performer and conferred the Rise Insta Award for 2021.
- Recipient of Exceptional team player award in 2020.
- Solid track record of successfully executing 15+ large and small scale projects using multiple technologies in 17+ years of association with IT industry.
- Earned several accolades from clients for on-time service delivery, exceptional adherence to SLA's, driving automations/business improvements and effective communication with management and teams.

Career Narrative

Growth Path: Client: AON Insurance Co., Chicago, USA | Since August 2010 till date

Recruited as a Senior Software Engineer; steadfastly progressed the career graph owing to stellar performance to become a Technology Lead. Driving operational goals, daily development plans and priorities by deploying Agile methodologies.

Technology Lead | Since June 2013 - Present

- Extending technical and thought leadership to a 11 member teams in design and development of highly scalable internet and intranet enterprise systems.
- Guiding the project teams by managing each Development Iteration (Sprints). Conducting backlog grooming session, sprint planning meeting, daily scrums.
- Steering product demos and demonstration of working prototypes to the stakeholders during each delivery milestone.
- Actively involved in end to end unit testing and integration testing.
- Bridging the gap between business and technology teams by translating business requirements into technical specifications.
- Key representative from the Application Team in Business meetings to understand the new requirements and to identify and interact with relevant client side and internal stakeholders to discuss the business and technical feasibility of the solution.
- Conducting requirements prioritization, gap/ impact analysis and finalizing on the solution design within the agreed SLA's
- Core team member in reviewing solutions at Architecture Review Board Meetings.
- Performing impact analysis on all interfacing applications to ensure the systems work seamlessly as before even after the software upgrades.
- Being the voice of the customer by acting as the SPOC for all their application related queries and for appropriate resolution of incidents / escalation.
- Collaborated with the pre-sales team in presenting various technical blueprints and proposed architecture for multi-million-dollar initiatives.

KEY FOCUS AREAS:

- Designed and developed Global Account Management System using ASP.NET MVC, .NET core, Bootstrap, JQuery, Angular and replaced the legacy system
- High scale background technologies designed and developed in RESTful services, web API and WCF services.
- Automated unit test case for RESTful services and web API and documentation using Swagger.
- Facilitated data integrations to the Global Account Management System using DocuSign, Chase Orbital Gateway.
- Demonstrated proficiency in CI/CD pipeline by automating deployment activities to various environments using DevOps on Microsoft VSTS in cloud.
- Setting up application components by deploying Kubernetes services.
- Upgrading applications from internal infra to Microsoft Azure platform (Infrastructure as service, IaaS).
- Conceptualized new VMs and virtual network security for our application projects and hosted the application components.
- Adept in using different source controls repositories like GIT, VSTS and TFS.
- Spearheaded multiple huge migration project from Oracle 10G to 19c, .NET 2.0 to .NET 4.7, SQL servers between 2008 to 2019
- Creating SSIS, Oracle packages and stored procedures.
- Successfully implemented entity framework projects
- Worked on different PDF generation software's like Planet Press, Aspose for generating different types of documents.

PROJECT FACTFILE:

- **Acx:** An internet facing web application developed using in .NET core, Angular, SQL database, REST API, SSIS packages. It is extensively deployed by client to access their policy documents after legal acceptance using DocuSign. They can view their invoice for policies and make payment using chase payment integration and generate their certificate in line with ACORD industry standards.
- **Bridge:** An intranet web application developed using .NET, Oracle, REST API, SAP Boxi report, Aspose and Planet Press. Accessed by several internal users as it is the primary policy management and transaction system. Facilitates generation of client policies, their invoice, certificates. ID cards are also auto-generated using this application.

Senior Software Engineer | August 2010 – June 2013

- Led a team of developers on a spectrum of projects that involved development of web applications in the insurance domain.
- Managed development milestones from initial steps till delivery.
- Played the role of a Configuration Controller- Coded, tested documented, reviewed artifacts and implemented automated solutions meeting business requirements and ensured adherence to SLA's for high scale applications.
- Conducted unit tests, tracked problems, and implemented changes to ensure adherence to test plan and functional/nonfunctional requirements
- Adjusted database design parameters to boost performance and incorporate new features. Worked on functional and technical design documents.
- Researched and resolved complex issues and implemented long-term solutions for frequently occurring issues.

KEY FOCUS AREAS:

- Built utility tools for assisting the support team in troubleshooting the application issues using Windows Application - C#, VB.net, WCF
- Proposed "Proof of Concepts" for validating various technology options and third-party tools like ASPOSE, Kendo UI, DocuSign integrations

Software Engineer | Hinduja Global Solutions (Retail Domain), Vashi, Mumbai | Oct 2007 – Aug 2010

- Commended by leadership team for the design and development of a highly scalable and data-intensive application using Microsoft Customer Care Framework and Windows Communication Foundation / C#
- Developed applications using C# and VB, .NET Framework 2.0 and JavaScript
- Successfully implemented the most complex module in the product after detailed work in design phase.

ACADEMIA:

- Bachelor of Technology (B.Tech) in Computer Science and Engineering, Sastra University, Thanjavur, India, April 2007.
