

PRANAV GUPTA

EXECUTIVE SUMMARY

AI platform Quality Manager - 14+ Yr

Strategic **Quality Leader with 14+ years delivering Test Strategy**, Quality Governance, and Production Readiness for high-velocity LLM validation, SaaS web and mobile platforms. Expert in building production-grade and enterprise delivery programs.

Also, prior experience as a **Technical Product Owner & Quality Leader with 2+ years** delivering scalable **SaaS web and mobile products** in Agile environments. Expert in product strategy, roadmap planning, backlog grooming (Jira), MVP scoping, and stakeholder alignment across US/APAC. Proven ability to translate product vision into engineering execution through DevSecOps, CI/CD gating, and Quality Assurance models, reducing escaped defects by 35% and accelerating release velocity. Domain expertise in FinTech, E-commerce, QSR, cloud kitchen, SaaS multi-tenant at enterprise applications, health platforms, and last-mile delivery systems.

PROFESSIONAL EXPERIENCE

AI Platform Automation Manager, 05/2023 - Current
GlobalLogic (Hitachi Company) - Noida

QA Test Lead, 11/2015 - 04/2023
Nagarro Software - Remote

Digital Product Owner, 12/2014 - 10/2015
Fidelity Information Services - Gurgaon

Business Analyst, 06/2014 - 12/2014
EXL Services

- Gurgaon

Test Analyst, 04/2011 - 06/2014
Tech Mahindra

- Pune

AI PLATFORM QUALITY MANAGER - (3 YRS RELEVANT)

- Defined enterprise **AI Quality Framework** covering model validation, data integrity, and production monitoring using **MLflow, Great Expectations, and Evidently AI**.
- Established ML testing strategy, including **data/concept drift detection, bias validation, accuracy benchmarking, and regression validation** with statistical evaluation metrics.

QA TOOLS AND AI SKILLS

- **Automation tools:** Selenium, Playwright, Browserstack, and Appium
 - **AI tools:** Data Modelling, n8n, Hugging Face, Langchain, NotebookLLM
 - **Frameworks:** Cucumber BDD, Page Object Model, POM
 - **Product tools:** JIRA, Figma, Primary research, MixPanel, Maze (user test validation)

-

ACCOMPLISHMENTS

- **Feature prioritization:** Optimized a product backlog of 150+ items using RICE and MoSCoW prioritization, reducing feature cycle time by 35% and delivering a critical MVP 2 weeks ahead of schedule.
- **Release Velocity:** Re-engineered CI/CD gating to shift from weekly to daily deployments, achieving a 50%

- Implemented **CI/CD-integrated model validation pipelines** using **Jenkins, GitHub Actions, Docker, and Kubernetes** to enforce automated quality gates pre-deployment.
 - Governed **LLM application testing** including prompt validation, hallucination risk analysis, and response consistency using OpenAI APIs and LangChain evaluation methods.
 - Designed production observability and RCA governance using **Grafana, and CloudWatch**, tracking model accuracy, latency, SLA adherence, and explainability compliance.
-

QA TEST LEAD - (8 YRS RELEVANT)

- Led enterprise QA delivery across functional, regression, and automation streams, ensuring production readiness and controlled releases.
 - Defined test strategy, test planning, governance standards, and risk-based validation frameworks across SIT, UAT, and release certification cycles.
 - Directed QA teams and collaborated with Product, DevOps, and business stakeholders to enable Agile delivery and continuous quality governance.
-

PRODUCT OWNER (2 YRS RELEVANT)

- Conducted market analysis to define the MVP scope, prioritizing API-first integrations with Stripe and global shipping providers.
 - Facilitated stakeholder workshops across US and Australia to align feature prioritization.
 - Ideas, Epics, Story and DoD designing and implementation.
 - Backlog Management and defect triage .
 - Multi-tenant SaaS Validation:
 - **Observability-First Design:** Piping session replay data and error logs directly into dashboards to identify user pain points instantly.
-

CORE MANAGER CAPABILITIES

- Quality Strategy & Governance
 - AI/MLOps Quality Engineering
 - Automation & DevOps Enablement
 - Production Reliability & Release Governance
-

WEBSITES, PORTFOLIOS AND PROFILES

[linkedin.com/in/pranav-gupta](https://www.linkedin.com/in/pranav-gupta)

CERTIFICATIONS

- ISTQB Foundation (License CTFL 0083189)
-

improvement in deployment frequency and reducing regression runtime from 4 days to 4 hours.

- **AI/ML Reliability:** Reduced LLM hallucination incidents by 25% through retrieval-augmented generation (RAG) grounding and rigorous prompt validation protocols.
- **Defect Mitigation:** Achieved a consistent Defect Removal Efficiency (DRE) of >95%, resulting in a 35% year-over-year reduction in customer-reported production errors.
- **Automation ROI:** Delivered a 300%+ Return on Investment by prioritizing 100% of revenue-critical business processes for automation using Playwright and Appium.

EDUCATION

B.Tech, Electronics & Communication Engineering, 01/2010
