Purnendu Gaurav

Project Manager at Capgemini | Program Management, Technical
Leadership

Greater Chicago Area

Summary

At Capgemini, my role as a Project Manager converges on spearheading FinTech projects with a keen focus on project management, integrating cloud solutions and advanced software development practices. With a Certified Scrum Master credential, I've steered teams towards Agile excellence, enhancing our delivery capabilities and ensuring that industry expectations are surpassed.

My expertise in AWS and containerization technologies underpins our strategic approach to optimizing project outcomes. This technical acumen, fostered over extensive hands-on experience, along with program management serves as a cornerstone for process optimization and empowers our cross functional teams to consistently achieve efficiency and operational excellence.
