Summary

My superpower as a Manager comes from my prior background as a developer.

A diligent professional skilled in Consulting, Product Strategy, Marketing, and Business Development who has expertise working on business planning, marketing research, and consulting in the manufacturing, real estate and pharma industries. In search of full-time product management summer internship opportunities, while obtaining my MBA at the University of California, Riverside. Traveling and dancing are two of my hobbies.

Skills: Python, Tableau, SAP HANA, Java, Adobe Analytics, SQL, Excel, Jira, Asana and Figma.

"The walls between art and engineering exist only in our minds" -
Theo Jansen

Experience

KATBOTZ®

Technical Project Manager

September 2024 - Present (8 months)

New Jersey, United States

In our fast-paced startup, I function as a Technical Project Manager, driving the successful delivery of ERP project. I oversee the manufacturing client account, ensuring high-quality service and strategic alignment, while also contributing to business development by acquiring new clients and fostering company growth. I represent our company at ASUG and in the SAP Community, while also creating and designing presentation deck/ marketing posts to boost our brand presence and engagement.

- Driving SAP Strategy & Execution – Collaborating with SAP leadership to define project roadmaps, align IT & business goals, and prioritize initiatives for maximum impact. Led the transition from sales to execution, ensuring all hand-off deliverables are in place and improving team alignment by 25%.
- Create project plans, schedules, budgets, and priority 1 tickets, keeping track of milestones and timelines to hit 90% of our deadlines.
- Enabling Change & Governance – Leading change management, optimizing project execution, tracking RAID logs, and ensuring seamless adoption of SAP solutions across the organization.
- Developing field enablement materials for our direct sales force including competitive information, training content, and sales kits
- Lead Agile processes and team coordination, including daily stand-ups, sprint planning, retrospectives, and time tracking to improve alignment, accountability, and continuous improvement.
- Manage budgets and stakeholder communication, ensuring financial goals are met, resources are used effectively, and development teams, product owners, and stakeholders stay aligned.

Royal 4 Systems

Technical Product Manager

April 2024 - June 2024 (3 months)
