EXPERIENCE:

FULL STACK DEVELOPER

CAPITAL ONE VIA TEKSYSTEMS — NEW YORK

2024 – PRESENT

- Built responsive, user-friendly interfaces using React, TypeScript, HTML, and CSS for enterprise data platforms.
- Developed advanced UI components, including high-performance data tables supporting filtering, search, pagination, and multi-select across millions of records.
- Integrated frontend applications with backend services (Fast API/Django-style APIs), ensuring seamless data flow and state synchronization.
- Improved UI performance and responsiveness through efficient rendering, memorization, and optimized state management (MobX).
- Ensured cross-browser compatibility and accessibility compliance across applications.
- Collaborated using Git-based workflows (GitHub/GitLab) in an Agile team environment.
- Worked closely with backend teams to design APIs optimized for frontend consumption.
- Contributed to deployment workflows in AWS cloud environments.
- Implemented distributed tracing and metrics using Open Telemetry and New Relic to improve system reliability and observability.
- Delivered a secure cloud-native architecture leveraging RDS, S3, Lambda, Route53, and Fargate.

BACKEND DATA ENGINEER

GOLDMAN SACHS VIA CONSULTADD—NEW YORK

2024

- Designed and implemented an equity margin loan data pipeline supporting mission-critical financial workflows.
- Developed APIs using Python and internal SLANG language for financial business logic processing.

- Architected scalable ETL pipelines loading structured and unstructured data into Sybase IQ and Snowflake.
- Performed deep data validation and anomaly detection using pandas and NumPy.
- Deployed production services via Terraform and enterprise monitoring frameworks.
- Collaborated with risk, compliance, and engineering teams to deliver production-grade data solutions.

SENIOR SOFTWARE ENGINEER

NUTRIEN AG SOLUTIONS VIA IONEQ INC.—LOVELAND, CO

2021–2024

- Developed full-stack web applications with a strong focus on frontend using React, TypeScript, Angular, HTML, and CSS.
- Built reusable UI components and implemented responsive design systems for web and mobile platforms.
- Integrated frontend with backend services using Django/GraphQL APIs, enabling dynamic and data-rich user experiences.
- Improved frontend performance and user experience through code splitting, lazy loading, and optimized API usage.
- Ensured cross-browser compatibility and accessibility standards across applications.
- Collaborated using Git (GitHub/GitLab) and contributed to CI/CD pipelines.
- Deployed applications to cloud environments (AWS), supporting full-stack delivery.
