

SYEDUZZAMAN KHAN

DANBURY, CT

University of the Pacific,
California

Candidate Profile

CORE SKILLS

- LANGUAGES: PYTHON
- TYPESCRIPTJAVASCRIPT
- SQLBACKEND: FASTAPI
- DJANGOFLASKREST
- GRAPHQLPYDANTIC
- FRONTEND: REACTMOBX
- REDUXANGULARHTML
- CSS
- DATABASES: POSTGRESQL
- MYSQLAMAZON RDS
- DYNAMODB

EDUCATION

Master of Science in Engineering
Science (Computer Engineering)
of the Pacific, California

AT A GLANCE

- 3+Years of professional
experience
- 5Roles across
different companies

PROFESSIONAL SUMMARY

Senior Software Engineer with 8+ years of experience designing, developing, and deploying scalable, high-performance applications across cloud-native and data-driven environments. Proven expertise in backend engineering (Python, FastAPI, Django), large-scale ETL pipelines, distributed systems, and full-stack development using React and TypeScript. Strong background in AWS architecture, database optimization, and observability with OpenTelemetry and New Relic. Experienced in building secure, resilient systems serving high-volume financial and enterprise workloads.

PROFESSIONAL EXPERIENCE

- Capital One via TekSystems — New York, NY

August 2024 – Present

Full Stack Developer

 - Contribute to the Enterprise Data Detection platform enabling automated discovery and classification of sensitive PII data across enterprise systems.
 - Designed and owned scalable AWS Glue (Spark) ETL pipelines processing GB-scale datasets from S3 and Snowflake/OneLake into Amazon RDS with idempotent upsert
 - Built serverless FastAPI microservices deployed on AWS Lambda delivering highly available and cost-efficient APIs.
 - Developed high-performance REST APIs serving millions of records with optimized pagination, filtering, and query strategies.
 - ▶ Implemented strong data validation using Pydantic models ensuring schema integrity and reliable downstream processing.
 - Enhanced frontend experience
- Goldman Sachs via ConsultAdd— New York, NY, Backend Data Engineer

June 2024 – August 2024

Backend Data Engineer

 - Designed and implemented an Equity Margin Loan data pipeline supporting mission-critical financial workflows.
 - Developed APIs using Python and internal SLANG language for financial business logic processing.
 - Architected scalable ETL pipelines loading structured and unstructured data into Sybase IQ and Snowflake.
 - Performed deep data validation and anomaly detection using pandas and NumPy.
 - Deployed production services via Terraform and enterprise monitoring frameworks.
 - Collaborated with risk, compliance, and engineering teams to deliver production-grade data solutions.
- Nutrien Ag Solutions via Ioneq Inc— Loveland, CO, Senior Software Engineer

June 2021 – March 2024

Senior Software Engineer

 - ▶ Designed and developed scalable Agri-tech platforms supporting crop planning and agricultural analytics.
 - Built secure backend services using Django and Python powering web and mobile applications.
 - Delivered full-stack features using React, TypeScript, Angular, Redux, GraphQL, and Material UI.
 - Optimized PostgreSQL and DynamoDB data models for high-volume datasets.
 - Deployed cloud-native solutions using AWS EC2, S3, RDS, Lambda, Elasticsearch, and API Gateway.
 - ▶ Implemented CI/CD pipelines with CodePipeline and CodeBuild.
- August 2014 – July

United Commercial Bank — Bangladesh, Software Developer

August 2014 – July

United Commercial Bank — Bangladesh, Software Developer

 - Developed REST APIs using Flask and SQLAlchemy for data center management
 - Built frontend applications using React, JavaScript, and HTML/CSS.
 - Optimized backend performance using Python functional constructs and efficient bulk data operations.
