

TANMAY BANERJEE

SENIOR FULL STACK DEVELOPER

Candidate Profile

Remote <https://www.linkedin.com/in/tanmay-banerjee-576aa7138/>

CORE SKILLS

- REACT.JS
- NEXT.JS
- REDUX
- JAVASCRIPT (ES6+)
- TYPESCRIPT
- HTML5
- CSS3
- WEBPACK
- NODE.JS
- NEST.JS
- EXPRESS.JS
- JAVA
- KOTLIN
- SPRINGBOOT
- RESTFUL APIS
- POSTGRESQL
- MYSQL
- GRAPHQL
- MONGODB
- NEO4J
- DYNAMODB
- REDIS
- MICROSERVICES
- EVENT DRIVEN
- SERVERLESS
- SECURE ARCHITECTURE
- MODULAR DESIGN
- JWT AUTHENTICATION
- JEST (UNIT TESTING)
- CYPRESS (E2E TESTING)
- GITHUB ACTIONS
- AWS CODEPIPELINE (CI/CD)
- AWS EC2
- S3
- LAMBDA
- ECS
- ECS - FARGATE
- SSM
- SES
- SNS
- SQS
- VPC
- ALB
- VPCE
- ASG
- SGS
- KAFKA
- RABBITMQ
- JS-CDK
- CLAUDE
- COPILOT
- JIRA

LANGUAGES

English Fluent

EDUCATION

Bachelor of Computer Applications
MAKAUT University

AT A GLANCE

3+ Years of professional experience

6 Roles across different companies

PROFESSIONAL SUMMARY

Results-driven Senior Full Stack Developer with 7+ years of experience architecting scalable microservices and web applications across legal-tech, healthcare, finance, hospitality, digital entertainment, and social platforms. Frontend specialist with deep expertise in React.js, Next.js, JavaScript, and TypeScript, delivering high-performance UI systems and achieving up to 80% performance optimization. Proficient in back-end engineering with 5+ years of hands-on experience in Node.js, Express, NestJS, RESTful APIs, PostgreSQL, MySQL, GraphQL, MongoDB, Neo4j, Kafka, RabbitMQ, Redis, focusing on secure, modular, and maintainable service design. Strong advocate of reusable component architecture and cross-platform engineering, reducing coderedundancy by 40% and accelerating development and deployment cycles. Experienced in designing secure authentication systems using JWT and encryption standards, with regulatory compliance exposure in healthcare environments. Skilled in Agile-based and AI-backed product delivery, CI/CD implementation, and AWS ECS, EC2, Lambda deployments, ensuring stable, production-ready releases. Proven technical leadership qualities, mentoring teams of 5-6 developers, conducting code reviews, and driving engineering best practices with high retention outcomes.

PROFESSIONAL EXPERIENCE

- Sr. Software Developer (Full Stack - Backend - Web Development)**

Oct 2022 – Present

Particle41 Pvt. Ltd.

- Architected an event-driven, serverless and scalable AWS ecosystem for Computershare's AutoGraph (A Legal-Tech & Fin-Tech Automation platform) that ensured a highly reliable and durable system in Node.js/Nest.js, PostgreSQL/TypeORM, Kafka, Redis handling automated corporate filings for 50 US states at a scale of 0.8M requests per day.
 - Leveraged DynamoDB and Lambda to improve system reliability while ensuring top-tier code quality using SonarCloud analysis.
 - Engineered an optimised predictive hearing-loss app for Lucid Hearing (A Hearing Healthcare and Medical Devices web platform), leveraging a new reusable design system to cut development cycles by 40% while maintaining bespoke UX standards.
 - Slashed Podium Audio (A Digital Entertainment platform) acquired Bookstat analytical dashboard latency by 60% and DB overhead by 35% by architecting Elasticsearch DSL APIs with advanced aggregations framed in Node.js/Nest.js, PostgreSQL, AWS, Kafka, Redis to power high-performance visualizations.
 - Delivered a 90% functional enterprise-franchisee POS/KDS feature in just 3 months; engineered a full-stack Node.js/Nest.js, PostgreSQL/TypeORM, RabbitMQ, Redis backend app and framed and optimised a React frontend client to streamline operations for Nigel POS (A hospitality Management platform).
 - Accelerated deployments by 50% and achieved 99.9% uptime by architecting CI/CD pipelines via GitHub Actions and AWS CodePipeline with Docker containerization. Eliminated regressions and ensured top-tier code quality by architecting a comprehensive TDD framework across Node.js/Nest.js (Jest), and React/NextJS (Cypress). Optimized cross-functional delivery through Agile methodologies and AI tools adaption like Claude and Copilot, streamlining Jira workflows to increase output and consistently exceed client expectations. Led back-end architecture decisions and mentored a team of 6 developers.
- Sr. Software Developer (Full Stack - Backend - Web Development)**

Jun 2022 – Sep 2022

Patch InfoTech Pvt. Ltd.

- Designed a highly cohesive and least coupled system by spearheading the transition from a monolithic to a serverless microservice architecture (NestJS, GraphQL, AWS Lambda, DynamoDB, Kafka, Redis) leading a 5-member agile team.
 - Boosted the NestJs app performance by mitigating memory leaks and cpu overheads detected during profiling and increased maintainability by 90% by implementing centralised logging, metric calculations on log analysis and service telemetry emissions.
 - Levelled up system resiliency, durability and security by implementing circuit-breaker pattern and throttling within services and applying gateway rate limiting, identity check and authorisation to services. Reduced system errors by 50% implementing global exception filters and catching errors early via validation pipes, and TypeORM, DTO whitelisting and guards for vulnerability remediation.
 - Streamlined processes engaging team into sprint planning, incremental-iterative delivery using CI/CD pipelines, 1-on-1 feedback sessions and tracking tasks via JIRA kanban boards. Led a team of 5-6 developers, conducted code reviews, mentored juniors, and supported hiring (90% retention).

- **Sr. Software Developer (Full Stack - Backend - Web Development)** Oct 2021 – May 2022
PixelQue Software Pvt. Ltd.
 - ▶ Led a 5-member team to deliver Oreilly's COVID Tracker (React/Next.js), GraphQL, Nest.js, MongoDB, RabbitMQ, Redis) while simultaneously optimizing legacy Javascript code for Perfecta, boosting performance by 30%
 - ▶ Slashed read latency by 50% and cut costs by 30% by automating a MongoDB to DynamoDB migration; optimized query performance by 40% via DAX cluster implementation.
- **Software Developer (Backend - Web Development)** Jan 2021 – Sep 2021
Intelgic Technologies Pvt. Ltd.
 - ▶ Boosted user engagement by 35% and slashed response times by 40% while leading a 4-member team to engineer a high-performance CRM backend (Nest.js, GraphQL, AWS, RabbitMQ, Redis) with Elasticsearch led analytical dashboard and Zapier automation.
 - ▶ Directed a 5-member team to deliver a high-performance Meeting Aggregator; implemented CI/CD (GitHub Actions) and Elasticsearch APIs to accelerate delivery by 45% and engagement by 35%.
- **Jr. Software Developer** Nov 2019 – Dec 2020
DeccanLogic Pvt. Ltd.
 - ▶ Spearheaded the full SDLC from LLD to deployment for Beyond Animal and Pi2Life, leveraging a high performance React-Redux, Node.js (Express.js) and Neo4j stack.
 - ▶ Designed and implemented engaging and interactive SPAs built using React components integrated with Redux for state management.
 - ▶ Improved application load time by 80%, increasing user engagement.
 - ▶ Operated cross-functional collaborations with 10 plus stakeholders in a dynamic startup, ensuring technical stability while consistently hitting aggressive business growth targets.
 - ▶ Designed high availability and secure Express.js RESTful APIs and optimized database queries, improving back-end data flow by 30% and contributing deployments on AWS EC2.
 - ▶ Mentored team members and conducted interviews to improve team capacity.
- **Freelance Static Website Developer** June 2018 – Oct 2019
Freelance
 - ▶ Curated index.html files using inline css to frame static website views for personal brand.
 - ▶ Served 9+ US clients.

KEY PROJECTS

- Developed a Next.js framework based Drone Mission Control platform with a real-time SITL simulator, utilizing WebSockets for 5Hz telemetry updates and a custom MissionCompiler to automate autonomous fli
