PROFESSIONAL EXPERIENCE

HSBC

Apr 2021 – Jun 2023

- ▶ Domain: Finance
- ▶ Developed advanced Power BI dashboards supporting financial analytics, risk reporting, and executive decision-making using optimized DAX and data models.
- ▶ Designed scalable data models integrating multiple financial data sources ensuring consistency, accuracy, and governance across reporting layers.
- ▶ Developed data-driven applications using low-code platforms (Power Apps) enabling business users to manage workflows, data entry, and reporting similar to QuickBase use cases.
- ▶ Collaborated with business stakeholders to gather requirements and translate them into scalable low-code solutions with optimized data models.
- ▶ Worked with financial datasets including transactions, risk metrics, and business KPIs in a banking environment to support reporting and decision-making.

General Motors

Nov 2017 – Mar 2021

Agile/Scrum

- ▶ Domain: Manufacturing
- ▶ Designed and developed interactive Power BI dashboards and Tableau visualizations to analyze manufacturing
- ▶ KPIs, supplier performance, and warranty claims, enabling data-driven operational improvements.
- ▶ Built scalable data models using star and snowflake schema optimized for Power BI datasets while ensuring compatibility with Tableau reporting layers for cross-platform analytics consumption.
- ▶ Built reporting solutions integrating multiple data sources (APIs, Excel, databases) to support analytics and operational dashboards.
- ▶ Handled large-scale manufacturing datasets and optimized reporting performance enabling faster decision-making for operations teams.
