PROFESSIONAL SUMMARY

Juan Carlos Barroso is an Industrial Designer | Product Developer | 3D Modeling & Printing with a proven track record across 6 roles at organisations including Clase Azul Mexico, Guadalajara, Jalisco, Los De Idea, Mexico City and Diafrom, Mexico City. Their background reflects strong operational capability, attention to detail, and a commitment to excellence in every position held.

PROFESSIONAL EXPERIENCE

- Sr. Product Development** 11/2023 – 12/2024
Clase Azul Mexico, Guadalajara, Jalisco
 - Responsible for developing new luxury consumer products and special edition projects, integrating creative and technical solutions. I collaborated closely with concept, engineering, manufacturing and project management
 - teams to ensure the feasibility and success of each project.
 - Mentored junior colleagues, helping them develop key skills and boost team performance.
- 3D Modeling and printing leader** 12/2022 – 11/2023
Clase Azul Mexico, Guadalajara, Jalisco
 - Managed the 3D modeling team mainly focused on prototyping, technical drawings, tooling, and 3D printing.
 - Oversee ceramics design and production to ensure timely delivery of high-quality prototypes and tools. Ensure efficient operation of 3D printers and maintain a steady supply of materials. Foster a collaborative environment to drive creativity and efficiency.
 - Led the development of a new stencil system, achieving 95% acceptance rate for quality standards in the application stage and reducing application time by at least 50% once the process was fully optimized.
- Product Designer & 3D Specialist** 11/2021 – 12/2022
Clase Azul Mexico, Guadalajara, Jalisco
 - My responsibility was to design a variety of products with innovative value propositions and present them through photorealistic renderings, 3D models, and prototypes accompanied by their corresponding technical documentation. I implemented the use of rapid prototyping for the development of new ceramic molds, enhancing quality consistency and fidelity to design requirements.
 - Equip the 3D workshop with adequate printers SLS, SLA & FDM, drawing tablets and 3D scanners.
 - Specialization in ceramic product design and development with a focus on technical precision.
- Industrial Designer Jr.** 07/2019 – 11/2021
Clase Azul Mexico, Guadalajara, Jalisco
 - As an industrial designer, I was responsible for generating new products and aligning conceptual designs with manufacturing on-site and with suppliers. I created technical documentation and visually represented ideas to support various departments.
 - Implemented the transition from handmade tools to 3D printing for creating precise mold models.
- Industrial Designer** 03/2017 – 02/2019
Los De Idea, Mexico City
 - Responsible for generating new retail materials and strong concepts with creative solutions with visual representations (renders) aligned with the needs and strategies of the client's brand.

- **Industrial Designer**

11/2016 - 03/2017

Diafrom, Mexico City

- As a designer at Diafrom, I was responsible for providing the clients with an overbudget and creative solution
- to their retail display needs. I proposed designs in line with manufacturing and logistics requirements to support the
- client in their product sales strategy needs.

KEY PROJECTS

- **Management**
- **Creativity**
- **Technical Drawing**
- **Prototyping**
- **3D Printing. SLA, FDM, SLS**
- **Problem Solving**
- **Leadership**
- **Teamwork**
- **Problem Solving**
- **Results Oriented**
- **Time management.**
