

Professional Summary

QA Automation Lead with ~ 15 years building enterprise-scale automation across healthcare, finance, and insurance. Expert in architecting robust frameworks using **Selenium, .Net C#, Playwright, Python, and API microservices** automation—delivering faster execution, higher coverage. Visionary contribution to integrating Gen AI into QA workflows, aligning test strategy with business objectives, and empowering QA teams to accelerate releases, reduce costs, and transform quality engineering into a strategic business advantage to align with stakeholders. Driving stakeholder satisfaction by strengthening product quality through **consumer reports, enforcing quality gateways, and implementing rollback-ready test strategies to reduce release risks, downstream implications**

Key Achievements

- Strong experience in design automation roadmaps, tool evaluation, ROI, self-healing tests, intelligent object creation, presentation skills, ability to lead large distributed automation teams
- Aligned QA strategy with business goals, cutting defect leakages. Drove quality engineering, focus on boosting release efficiency 90% and customer satisfaction
- Optimized resource allocation, lifting team productivity, increasing test automation adoption 95%, GenAI for predictive test selection, check for code smell, strengthened test coverage
- Led cross-functional QA teams, designed test strategy, improved testing process excellence, delivering large-scale automation with 1,000+ test cases and faster cycles to align with business stakeholder's monthly consumer detriment runs
- Built reusable frameworks (**Selenium, .NET C#, NUnit, Playwright, Python, Pytest BDD, APIs, Microservices**) for achieving 99% test stability and reduced maintenance
- **12+ years in healthcare (EMR, EHR, HIPAA, Medicare, Medicaid, HIX, Surescripts, SOAP), Fintech, Insurance domains**
- Applied advanced troubleshooting techniques to eliminate test flakiness, optimizing risk-based testing approaches
- Created page object model and design patterns to maximize code reusability, reducing maintenance costs and improving framework adaptability

Core Competencies

- **GenAI:** GitHub Copilot, MCP, Agent AI, Pick Model, Prompt Engineering, Test Optimization, NLP, LLM
- **UI Test Automation:** Selenium .Net C#, Playwright Python, Coded UI .Net, Automation; Frameworks: .Net Core, NUnit, xUnit, MS Test, Pytest BDD, Specflow, Reqnroll
- **Cloud & Containers:** AWS EC2, Lambda, S3, Azure, Docker, Kubernetes, Browser stack, RabbitMQ
- **Platform Services:** API, Microservices, Swagger, API Automation: Postman, Soap UI, BRUNO, Ready API, Newman, Event Driven Testing
- **Programming:** Microsoft .Net C#, Java Script, JSON, XML, HTML, CSS, AJAX, XPATH
- **CI/CD & DevOps:** Jenkins, Azure DevOps, Bitbucket, AWS
- **Databases:** SQL Server, MySQL, AWS Dynamo DB, Azure Data Studio, Monitoring & Logging: Grafana, Splunk, AWS Cloud Watch, Postmark
- **Test Management:** JIRA, Azure Devops, Zephyr, qTest, TFS, MTM, Confluence, Agile (Scrum, Kanban), SDLC/STLC, Code Reps: TFS, Azure DevOps, Bitbucket, GitHub, Git

Academic Summary

- B. Tech in E.C.E from JNTU in 2006, Hyderabad, Telangana

Professional Experience

Experian Services India | Automation Test Lead | Oct 2022 – Feb 2026

- Led automation test development for EBC, EBA, Bottle Necks, Konfir, BIQ Legacy projects.
- Established automation OKRs, branch strategies, and ROI metrics that consistently delivered.
- Built scalable Playwright Pytest BDD, Selenium C# NUnit frameworks, reducing regression cycle 2 days to 12 hours. Integrated Copilot, MCP to accelerate test script generation, cutting authoring time by 40%.
- Mentored 10+ QA engineers, improved test coverage to 99% across critical workflows.
- Working with DevOps to embed automation into CI/CD pipelines, enabling quick deployments.

Adroitent ITES Global Services | Test Lead | Feb 2014 – Oct 2022

- Led QA delivery for **Wolters Kluwer healthcare products (the Point, NC, DocuCare, Ovid)**.
- Mentored & Coach 8 QA engineers, establishing reusable frameworks and branch strategies.

Sonata Software | Techno Functional Consultant | Jun 2013 – Jan 2014

- Supported Microsoft Dynamics CRM functional scenarios, Increased defect detection rate
- Delivered on time test efficiency with zero production defects for TUI Europe.

J.L Software Solutions (Green Clinical Sys. -Jasper Industries) | Quality Analyst | Dec 2011 – May 2013

- Thoroughly learnt EMR/EHR workflows, ensuring HIPAA compliance.
- Reduced patient portal defects by 25% through proactive test coverage.

Dolphane Info Solutions | Software Engineer | Nov 2007 – Dec 2009

- Developed smoke/regression test cases for Liberty Health Care scheduling system.
- Enhanced release quality by increasing test efficiency

Awards

- Spot Award (2025) – “Collaborate to Win” for seamless QA delivery at Experian.
- Spot Award (2024) – Reduced API Test Suite Execution Time by 95% at Experian.
- STAR VIP Recognition (2017) – Automation framework adopted, Delivered at Wolters Kluwer

Certifications

- Certified “AWS Solutions Architect - Associate”, 2026
- Certified “Microsoft-Azure Fundamentals”, 2026
- Certified “Agile Leadership (Scrum Alliance)”, 2023
- Certified “AWS Cloud Technical Essentials”, 2023
