

RAJDEEP JADAV

Senior Software Engineer

rajjadav14@gmail.com | +91-9157098922 | A-11/2 Shantivan Colony, Mundra, Kutch, Gujarat, India

SUMMARY

I am a senior software developer with 6+ years of experience, specializing in writing clean, efficient, and maintainable code within deadlines. I am highly motivated, adaptable, and always eager to learn new technologies and skills to deliver impactful and innovative solutions

EDUCATION

Bachelor of Engineering (BE) – 7.29 CGPA **2016–2020**

Aditya Silver Oak Institute Of Technology

- Branch – Computer Engineering
- University – Gujarat Technological University (GTU)

HSC (Science) – 75.8% **2014–2016**

Adani Public School

- Board – CBSE

SSC – 83.6% **2012–2014**

Adani Public School

- Board – CBSE

KEY SKILLS

Languages :- Javascript (JS) , Typescript (TS) , Python 3 (py)

Backend Tech :- FastAPI , Node Js, Express Js, Nest js, GraphQL

Frontend Tech :- HTML , CSS , React Js, Next Js, Redux

Database :- MongoDB , PostgreSQL, MySQL , DynamoDB

Cloud :- AWS , Kubernetes, Helm Charts , Serverless, Terraform , Microservice , CI/CD , Github Actions

AWS :- VPC, EC2, S3, Lambda, DynamoDB, RDS, ECS, Fargate, API Gateway , ELB, Cloudwatch, Cloudfront, IAM , EFS and more.

Miscellaneous :- Docker , Redis, Stripe, Grafana k6 , Apigee X , RabbitMQ , Microsoft EntraID , Datadog , OpenAPI , OAuth2, JWT, pytest, Jest

AI Tools :- Github Copilot, Cursor , Claude code

WORK EXPERIENCE

Company Name – Tatvasoft

01-Jan-2020 to 30-Nov-2022

Project Name – Equals Group – PLC

I was working on a Project of Equals Group, a UK based company which provides financial services. It is a **forex and banking platform** for trading of multiple currencies across various countries using various payment methods. I worked as a fullstack developer with react in FE and node, python in BE. My roles were :-

- Involved in the design and development of development of new features and functionalities using **React** for frontend and **Node , Typescript, Python ,GraphQL** for with **serverless** backend.
- Worked with **Terraform** to handle entire **AWS infrastructure**.
- Built and managed **microservices** leveraging multiple AWS services..
- Worked with multiple Databases like **PostgreSQL** and **DynamoDB**
- Collaborated closely with on-site clients to design and build the application.

Company Name – Growexx

05-Dec-2022 to 18-Aug-2023

Project Name –Reader.io

Reader io is a SaaS based platform for extracting information from pdf or images. We can train the application for the pdf first and then it will automatically grab information from similar pdfs. My roles were :-

- Designed the **architecture** for backend in **Express Js (Typescript)** .
- **Dockerized** server on **AWS EC2** with **Auto Scaling** and **Load Balancing** for **scalability**..
- Created **interactive UI** using React Js with Antd Library. wrote unit test using **Jest**.
- Integrated **Stripe** to enable payment processing.
- Used **Agile** methodology, actively participating in **Scrum** ceremonies and managing tasks through **Jira**.
- Designed and supervised **MongoDB Atlas** database.

Company Name – OpenXcell

20-Nov-2023 to 28-Feb-2025

Project Name – USCCB

United States Conference of Catholic Bishop (USCCB) is an organization of catholic bishops. We were tasked with developing a mobile application (Flutter) ,a **CMS Portal** (React) for management, and a backend server (**Nest Js**) to create and monitor church- related activities. My roles were :-

- **Made Architecture Design** including tech stack and code flow diagrams as this was **green field project**.
- Design the **Nest Js** and **FastAPI** architecture **from scratch**.
- Design and maintain both Relational and Non-Relational Databases.
- created CMS portal using React Js.
- Created API's for both Mobile application and CMS portal.

Company Name – FunicTech

03-March-2025 to 03-April-2026

Project Name – Cognizant-Liberty Mutual (Contractor)

Working as Contractor with Liberty Mutual. Created , updated, upgraded and maintained geospatial API's. Worked with onshore team ,clients and vendors to maintain API's.

My roles were :-

- Maintaining and Updating Backend APIs Connect with client daily for **scrum call**.
- Worked with **aws-cdk-lib** and **boto3** to maintain entire **AWS infrastructure**.
- Helped with AWS ECS migration to **Kubernetes** with **Helm Charts**.
- Created **Lambda functions** in Python, Node and Java.
- Created UI in **React Js**.
- worked extensively with AWS infrastructure.
- Implemented dataload workflow using **Event Driven architecture** and made the dataload **fault tolerant**
- Added new services from scratch, which used **Microsoft EntraID** for auth, **ApigeeX** from API management, **Datadog** for logging and AWS lambda for computation.
- Implemented **CI/CD pipeline** using **Github Actions**.
- Tested and updated the **DR environments**.
