Profile

Senior Frontend and AI Application Developer with extensive experience in building responsive, user-centric web applications. Adept in JavaScript, TypeScript, Node, React, and CSS, with a strong focus on delivering intuitive, accessible and performant interfaces. Experienced in integrating AI-driven features into modern web experiences, including the development of [Pathly](#), an AI-powered learning path generator built with Nextjs, TypeScript and AWS Bedrock (Nova Micro). Known for a collaborative approach, working closely with cross-functional teams to drive innovation and create inclusive digital experiences. Passionate about combining technical expertise with design principles to build solutions that meet both user needs and business goals. Proven ability to lead projects and deliver high-quality results in fast-paced, Agile environments.

Skills

- JavaScript
- React
- Node
- Redux
- AWS
- TypeScript
- Nextjs
- NPM, Yarn
- CSS
- Azure

Projects

PATHLY – AI-POWERED LEARNING PATH GENERATOR – 2025

Personal project / Nextjs, Typescript, Tailwind CSS, AWS Bedrock (Nova Micro)

- Designed and developed an AI-driven web application that generates personalized learning paths through a conversational interface.
- Implemented real-time response streaming with AWS Bedrock's Nova Micro model to create natural chat interactions.
- Built reusable, TypeScript-based components in Next.js for scalability and rapid iteration.
- Currently expanding features to include A11Y, multi-turn conversations, fine-tuning, and enhanced error handling.

Experience

SENIOR FRONTEND DEVELOPER / ARCHITECT, FOUNDATION MEDICINE

CAMBRIDGE, MASS – 2014-2024

- Acted as the primary liaison between Zurb Foundation's design team and FMI's engineering team, ensuring seamless collaboration on UX and accessibility design with React and Material UI.
- Spearheaded the development of the Interactive Cancer Explorer, a pioneering portal that allowed pathologists to securely view and download clinical reports, driving 60% of customer engagement.

- Led a team of six to build and maintain applications using Yarn to configure and optimize Webpack for bundling React applications, including setting up projects for React, Redux, TypeScript, SCSS, and other assets.
- Created scalable RESTful APIs and middleware services using React, Redux, Node and Express.js.
- Designed and developed responsive user interfaces using React, Redux, HTML5, and Bootstrap.
- Oversaw the migration of legacy applications from Angular to ReactJS, while reducing tech debt and continuously adding new features to the Interactive Cancer Explorer.

SENIOR FRONTEND DEVELOPER, NEXT ISSUE MEDIA – PALO ALTO, CA – 2012-2014

- Played a key role in building a magazine storefront where users could buy or subscribe to magazines, manage accounts, and browse previews, contributing to an engaging e-commerce platform. Utilized Grails framework and Groovy scripting to create robust and scalable web applications, optimizing performance and usability.
- Developed responsive user interfaces for tablets and handheld devices using HTML5, Bootstrap, and jQuery, ensuring seamless experiences across different screen sizes through Javascript and media queries.
- Collaborated with cross-functional teams to enhance the UI and functionality of the platform, improving user engagement and overall experience.
- Contributed to the success of Nextissue, which ultimately led to its acquisition by Apple, highlighting the commercial impact of the developed web solutions.

SENIOR WEB DEVELOPER FOR OVI R&D ORGANIZATION – MOUNTAIN VIEW, CA – 2008-2012

- Developed the OVI Calendar application as a front-end web developer using Photoshop, XHTML, CSS2/CSS3, JSP, jQuery, and AJAX, collaborating closely with backend Java developers for seamless integration.
- Led the design implementation process, addressing cross-browser compatibility issues and ensuring mobile web development best practices were followed.
- Applied internationalization (I18N) techniques to optimize the OVI Calendar for global users, ensuring localization across multiple languages and regions.
- Worked within an Agile development environment, contributing to sprint planning, iterative development, and continuous delivery.
- Focused on delivering a responsive and user-friendly interface, improving user experience on both desktop and mobile platforms.

GLG – REMOTE – CURRENT NETWORK MEMBER – SEPTEMBER, 2024 – OCTOBER 2025

- As a GLG Network Member, I bring extensive experience in user interface technologies, modern JavaScript frameworks and workflows. I help clients optimize their front-end architecture, streamline development processes, and implement best practices for building scalable, maintainable, and engaging user interfaces.

Education

Associates or Arts in Design / Multimedia – Masters Institute
