

KAMALESHWER PEDDAMALKA

Sr. Power BI / Azure Developer

PROFESSIONAL SUMMARY

- Over 12+ years of IT experience in Power BI/ SQL Development primarily using PowerBI, SQL, PL/SQL, MS SQL, SQL*FORMS, SQL Server, Business Intelligence through SQL Server Integration, Analysis and Reporting Services (SSIS, SSAS, SSRS).
- Involved in all phases of the SDLC (Software Development Life Cycle) from analysis, design, development, testing, implementation and maintenance with timely delivery against aggressive deadlines.
- Strong experience of developing, implementing and maintaining application systems under UNIX Operating System using SQL, PL/SQL, SQL*FORMS, SQL Server, Unix Shell Script, Oracle 10g/9i database.
- Extensive experience in Design and Develop ETL Processes data from external sources like Azure Blob Storage, Azure Data Lake Gen2 and ORC/Parquet/Text Files into Azure SQL Data Warehouse (Azure Synapse).
- Extensive experience using Azure Key Vault to Encrypt keys and Passwords.
- Experience building Notebooks inside Azure Databricks using Python.
- Experience creating, scheduling, and monitoring Spark Jobs in Azure Databricks.
- Extensive experience in implementing Microsoft BI/Azure BI solutions like Azure Data Factory, Power BI, Azure Databricks, Azure Analysis Services, SQL Server Integration Services, SQL Server Reporting Services and Tableau.
- Experience in Designing and Building the Dimensions and cubes with star schema using SQL Server Analysis Services (SSAS).
- Set up Microsoft Flow (Power Automate) to provide auto-approval and status update features based on predefined criteria.
- Experience with Snowflake utilities Snow Pipe and Snow SQL techniques using Python.
- Migrated data from on-premises SQL Database servers to Azure SQL Database servers by designing Azure Data Factory Pipelines using the Azure Data Factory copy tool and Self-Hosted Runtimes.
- Worked with various Azure services like Web Roles, Worker Roles, Azure Websites, Caching, SQL Azure, API Management, Active Directory (AD) services, Azure Active Directory (AAD) infrastructure, with periodic auditing, troubleshooting and performance monitoring.
- Created Azure Blob storage for storing ARM templates.
- Worked on creating tabular models on Azure Analysis Services for meeting business reporting requirements.
- Written Python scripting for visualization in Power BI Desktop.
- Experience designing and deploying **AI Agents using Copilot Studio** with prompt engineering, orchestration logic, and grounding strategies for conversational automation and intelligent decision support.
- Proficient in **Microsoft Fabric** for unified data integration and analytics across enterprise data platforms.
- Worked on writing APIs in Python.
- Contributed to **Power Platform Center of Excellence (CoE)** standards, governance frameworks, and architectural documentation.
- Worked with Power BI, DAX expressions, Power View and Power Query.
- Worked on Continuous Integration (CI) / Continuous Delivery (CD) pipeline for Azure Cloud Services using CHEF.
- Experience implementing **Power Platform ALM** best practices including solution layering, environment strategy, and CI/CD pipelines using Azure DevOps.
- Vast experience in extracting, transforming and loading (ETL) data from OLTP (transactional) databases and other data sources, including heterogeneous and homogeneous sources into Data Warehouse, in SSIS using various tasks and transformations.
- Experience in using Unix for automation of SAS Programs.
- Expert in developing T-SQL (DDL, DML) statements, Data Integrity (constraints), Rules and Validation issues including complicated joins and cursor loops, creating indexes for fast retrieval of data, creating views, indexes, triggers, cursors, stored procedures and functions.
- Implemented Copy activity, Custom Azure Data Factory Pipeline Activities for On-cloud ETL processing.

- Extensive experience using Logic Apps and Power BI Report Server in Azure Environment.
- Migrated around 200 Excel reports into Power BI reports; dataset size in the millions.
- Embedded Power BI reports on SharePoint portal page and managed access of reports and data for individual users using Roles.
- Experience in creating ETL mappings in SSIS to load data from different sources to different target databases, including data analysis, data profiling, data transformation, data mapping, data cleansing and data quality.
- Worked in dimensional modeling with Star & Snowflake schemas and created the Data Source Views (DSV) and SSAS Cubes using identified Fact and Dimensional Tables.
- Effectively made use of Table Functions, Indexes, Table Partitioning, Collections, Analytical functions, Materialized Views, Query Re-Write and Transportable table spaces.
- Working knowledge in Agile/Scrum Environment and used TFS (Team Foundation Server).
- Skilled in error and event handling: Implemented checkpoints, breakpoints, event handlers, troubleshooting, and error handling in SSIS packages to improve usability and reliability.
- Excellent communication, interpersonal, analytical skills and strong ability to perform as part of a team.

TECHNICAL SKILLS

Languages:	T-SQL, PL/SQL, Dynamic SQL, MDX, DAX, C#, ASP (.NET), XML, HTML, Shell Scripting, Python
Databases:	MS SQL Server 2008–2019, Oracle 9i/10g, Snowflake, Netezza, DB2, Azure SQL
BI Tools:	Power BI Desktop, Power BI Service, Power BI Pro, Power BI Embedded, SSRS, SSAS, SSIS, BIDS, Tableau, Crystal Reports, DAX Studio, Paginated Reports, Power View, Power Map, Power Pivot
Cloud & Azure:	Azure Data Factory (ADF), Azure Databricks, Azure Synapse Analytics, Azure Data Lake Gen2, Azure Blob Storage, Azure Key Vault, Azure Active Directory (AAD), Azure DevOps, Azure Analysis Services, Logic Apps, Power Automate
Data Modeling:	Star Schema, Snowflake Schema, Kimball & Inmon Methodologies, FACT & Dimension Tables, Physical & Logical Data Modeling, ERWIN 4.5/4.0, MS Visio
ETL Tools:	SSIS, Alteryx, Azure Data Factory Pipelines, Spark SQL, Snowflake SnowPipe / SnowSQL, Informatica PowerCenter
Dev Tools:	SQL Server Management Studio (SSMS), Visual Studio, DAX Studio, TFS, Jenkins, Confluence, SharePoint, SQL Profiler
Methodology:	Agile / Scrum, SDLC, CI/CD, DevOps

CERTIFICATIONS

- Microsoft Certified: Power BI Data Analyst Associate
- Microsoft Certified Technology Specialist: SQL Server 2008, Business Intelligence Development and Maintenance

EDUCATION

Master of Science, Computer Science Engineering — University of Central Missouri (2015 – 2016)

Bachelor of Engineering, Computer Science — Maheshwara Engineering College (2009 – 2013)

PROFESSIONAL EXPERIENCE

Sr. Power BI Engineer

04/2023 – Present

American Airlines | Dallas, TX

Project: Cyber Governance

- Migrated reports from Tableau to Power BI, consolidating the enterprise reporting platform.

- Developed Power Automate flows to pick files from Outlook and store them into a Network shared folder.
- Implemented ETL process in Alteryx to extract data from multiple sources including CSV and Excel files, and scheduled workflows in a Cloud environment.
- Managed end-to-end complex data migration, conversion, and data modeling using Alteryx, and created visualizations using Power BI Desktop to develop high-quality dashboards.
- Extracted data from different data sources including Archer, CrowdStrike, Proofpoint, and OneTrust APIs into the Alteryx ETL tool.
- Performed end-to-end migration of Tableau dashboards to Power BI, including datasource remapping, DAX measure conversion, and visual parity validation to ensure business continuity.
- Built **Dataverse data models** with complex table relationships, business rules, calculated columns, and role-based security aligned with enterprise compliance requirements.
- Created designs and process flows to standardize Power BI Dashboards to meet business requirements.
- Developed **advanced Power Automate flows** using error handling, parallel branching, and custom connectors to integrate Power Platform with external REST APIs and Azure services.
- Used Power BI Power Pivot to develop data analysis prototypes, and used Power View and PowerMap to visualize reports.
- Created DAX calculated columns in Power Pivot worksheets to extract, import, and join data from different sources.
- Applied advanced Business Objects techniques to present data including contexts, drill-downs, hierarchies, advanced functions, predefined conditions, and prompts.
- Defined datasets with joins and sub-queries for complex queries involving multiple tables in Power BI.
- Participated in **Power Platform ALM** processes including solution-aware development, environment promotion (DEV → TEST → PROD), and source control integration via Azure DevOps.
- Created data pipelines in Power BI Service to publish reports across DEV, TEST, and PROD staging environments.
- Worked on Administration functions including deploying code solutions via PowerShell scripts.
- Contributed to the **Center of Excellence (CoE)** by documenting reusable patterns, best practices, and architectural standards for Power Platform development across teams.
- Assisted in **solution design reviews**, providing technical direction and coding standards guidance to internal developers and cross-functional stakeholders.
- Integrated **Microsoft Fabric** pipelines with Snowflake and Power BI semantic models to enable real-time analytics and unified data access across enterprise platforms.
- Monitored and optimized **Power Platform solution performance**, including automation reliability, Power Automate flow run history analysis, and capacity usage reporting.
- Scheduled jobs for creating snapshots of Power BI Reports and Dashboards, and troubleshoot datasets for Power BI sites.
- Used Microsoft Power BI Power Query to extract data from external sources and modify data with calculated columns as required in Excel; created SSIS packages to load Excel sheets into the database.
- Implemented Row-Level Security (RLS) to restrict user access to reports and data.
- Built Azure Data Factory pipelines to ingest security data from CrowdStrike, Proofpoint, and Archer APIs into Snowflake, enabling automated daily data refresh for Power BI dashboards.
- Used Azure Databricks notebooks to perform data cleansing and transformation on raw security event data before loading into Snowflake for Power BI reporting.
- Implemented parameterized ADF pipelines to support reusable data ingestion patterns across multiple security data sources.
- Created reusable DAX measure scripts in Tabular Editor and applied Best Practice Analyzer (BPA) rules to enforce DAX coding standards and identify performance anti-patterns across datasets.
- Created pipeline schedules within Power BI Service.
- Used ALM Toolkit to compare and deploy Power BI dataset (XMLA) changes across DEV, TEST, and PROD workspaces, enabling controlled metadata deployments without full report republishing.
- Experienced in migrating reports from SQL Server datasource to Snowflake.
- Wrote Snowflake SQL queries and created views to support Power BI semantic layer requirements, replacing legacy SQL Server datasources.

- Worked with different technology teams to gather requirements and created functional documentation.
- Troubleshoot Power BI reports using Performance Analyzer within Power BI Desktop.
- Used DAX Studio to analyze the data model and optimize DAX functions to run queries in milliseconds.
- Created dataflows in Power BI Service and called the Archer API into the dataflow.
- Created ECRG Dashboard visible to Managers, VP, and CFO.

Environment: Power BI Desktop, Power BI Service, Snowflake, Alteryx, Excel, Power Query, Power Pivot, DAX Studio, Power Automate, Tableau, Tableau editor, ADF, Azure Data Bricks, AML tool Kit

Sr. Power BI Engineer

09/2021 – 03/2023

Fidelity Investments (DISYS / Signature) | Dallas, TX

- Designed and implemented Snowflake data warehouse and databases.
- Experienced with data integration, data loading, and data querying within Snowflake.
- Implemented Snowflake Streams and Tasks to build near-real-time Change Data Capture (CDC) pipelines, feeding updated financial records into Power BI dashboards.
- Used Snowflake Time Travel and Fail-Safe features for data recovery and audit trail requirements in compliance-sensitive.
- Managed and optimized Snowflake performance and scalability.
- Worked on Snowflake SnowPipe for real-time data ingestion.
- Experienced in Power BI admin tenant settings, capacity settings, and usage metrics.
- Created paginated reports in Power BI Service and implemented Row-Level Security (RLS) in Power BI Desktop.
- Used Databricks for encrypting data using server-side encryption.
- Created data pipelines in Power BI Service to publish reports across DEV, TEST, and PROD staging environments.
- Managed access permissions for each environment in Power BI Service.
- Used Performance Analyzer to investigate slow Power BI report performance; used DAX Studio to modify DAX calculations and improve report performance.
- Extensively used analytical features in Tableau including statistical functions, calculations, trend lines, and forecasting in Tableau reports.
- Published developed dashboards and reports to Tableau Server for end-user access.
- Designed and developed Power BI graphical and visualization solutions based on business requirement documents; created interactive dashboards.
- Experienced in Power BI, Power BI Pro, and Power BI Mobile.
- Implemented Row-Level Security (RLS) on data and applied complete understanding of application security layer models in Power BI.
- Built ADF pipelines with error handling, retry logic, and email alerting to ensure data pipeline reliability for critical financial reporting.
- Designed and deployed Azure Data Factory pipelines to orchestrate data movement from on-premises SQL Server and Snowflake into Azure SQL DW, supporting Power BI dataset refresh schedules.
- Experienced in scheduling tasks using Windows Task Scheduler.
- Used ALM Toolkit to manage Power BI Premium dataset deployments across environments, enabling source-controlled model changes and eliminating manual republishing errors.
- Integrated ALM Toolkit with Azure DevOps pipelines to automate Power BI dataset CI/CD, synchronizing model changes from Git to Power BI Service workspaces.
- Created a Jenkins pipeline to publish Power BI reports to Power BI Service.
- Published Power BI reports from Power BI Desktop to Power BI Service.

Environment: Power BI Desktop, Power BI Service, Snowflake, Jenkins, Excel, Power Query, Power Pivot, Databricks, DAX Studio, Tabular editor, ALM tool kit, Power APP, Power Automated, ADF

Sr. Power BI Developer

06/2020 – 08/2021

Walmart / Sam's Club | Dallas, TX

- Developed complex programs in T-SQL, writing Stored Procedures, Triggers, and Queries with optimized execution plans.

- Extensively used Joins and Sub-Queries to simplify complex queries involving multiple tables.
- Generated server-side PL/SQL scripts for data manipulation and validation, and created materialized views for remote instances.
- Used Configuration Files in SSIS to simplify the process of moving packages across servers.
- Applied expertise in DAX Queries to build Power BI calculated measures and calculated columns.
- Built a Tabular Model cube from scratch and used MDX and DAX queries to fetch data into SSRS and Power BI reports.
- Involved in continuous enhancements and fixing of production issues.
- Used MDX to interact with back-end OLAP Services.
- Introduced SAP HANA Hints to improve coding performance across various data flows.
- Used various sources to pull data into Power BI including SQL Server, SAP BW, Oracle, and Azure SQL.
- Worked on migrating Excel reports to Power BI Desktop.
- Worked on migration of OBIEE to Power BI.
- Embedded Power BI Reports into a .NET Application via REST APIs for improved end-user access and flexibility.
- Extensively worked on SAP HANA calculation views to perform data transformations.
- Worked on Performance Improvement for SAP HANA Views.
- Implemented Copy activity, Data Flow, and Triggers in Azure Data Factory Pipeline Activities.
- Developed ETL solutions using Spark SQL in Azure Databricks for data extraction, transformation, and aggregation from multiple file formats and data sources.
- Developed multiple complex ETL pipelines and activity stores for full and incremental data loads into Azure SQL DW.
- Designed and developed ETL pipelines to read data from CRM, ADP (HR and Payroll), and JDE (Operational) sources and load into Azure SQL Data Warehouse.
- Integrated Power BI App with Azure Active Directory Groups and Office 365 groups to implement Row-Level Security.
- Created Power Automate flow to copy files from a SharePoint folder to an Azure Blob folder.
- Designed and developed various objects including External Tables (HDFS format on Azure Cloud Storage), Relational Tables, and Views.
- Created Power Automate flow to send push notifications when a work item is assigned in Azure DevOps.
- Architected and implemented ETL and data movement solutions using Azure Data Factory and SSIS; created and ran SSIS packages.
- Worked on Cloud Database Snowflake Data Warehouse and integrated an automated generic Python framework to process XML, CSV, JSON, TSV, and TXT files.
- Deployed Azure Resource Manager (ARM) JSON Templates from PowerShell; worked on Azure suite including Azure SQL Database, Azure Data Lake, Azure Data Factory, Azure SQL Data Warehouse, and Azure Analysis Services.
- Automated data flows from Alteryx to Azure Databricks using Spark and pushed data into Azure SQL Server.
- Created Spark clusters and configured high-concurrency clusters using Azure Databricks to accelerate high-quality data preparation.
- Extensively used Azure Data Lake and worked with CSV, Parquet, and Delta file formats.
- Used ETL/ELT process with Azure Data Warehouse to store data in Blob Storage with no volume limitation.
- Created Dashboards to present critical company data in a single consolidated report.
- Created list reports and cross-tab reports using Cognos 10.1.
- Experienced in migrating projects from MicroStrategy, Cognos, OBIEE, and Tableau to Power BI.
- Developed Power Automate flows to trigger database refresh and refresh data in Power BI Desktop.
- Created Power Automate flows to send emails to executives.
- Connected Workday HR data to Power BI to develop visualizations.
- Published Power BI reports from Power BI Desktop to Power BI Service.
- Experienced in Self-Service analytics and creating dataflows in Power BI Service.
- Automated Power Query refresh using PowerShell scripts and Windows Task Scheduler.
- Worked on custom visualizations using React.js, Node.js, and Angular.js for web applications.
- Experienced with Alteryx tool for ETL transformations and scheduling refreshes in Alteryx Gallery.

Environment: SQL Server 2016, SSIS, SSRS, SSAS, Alteryx Designer, Power BI Desktop, Power BI Service, Power BI Pro, Tableau Desktop 2020.3, Tableau Server, Excel, Power Query, Power Pivot, Python, Azure Suite, Snowflake

Sr. Power BI Developer

01/2020 – 05/2020

Chevron Corporation | San Ramon, CA

- Involved in the Requirement Analysis, Design, and Development phases of the SDLC.
- Developed SSIS Packages using Pivot Transformation, Fuzzy Lookup, Derived Columns, Conditional Split, Term Extraction, Aggregate, Execute SQL Task, Data Flow Task, and Execute Package Task to generate underlying data for reports and export cleaned data from Excel Spreadsheets, Text files, MS Access, and CSV files to the data warehouse.
- Deployed and scheduled reports using SSRS to generate daily, weekly, monthly, and quarterly periodic reports.
- Created SQL Server Reports using SSRS and exported them to Excel format for managers and the QA team for easy validation.
- Worked with DAX/MDX queries to build expressions for various business calculations.
- Created calculations using MDX and supported DAX expressions used in Pivot Table reports.
- Used various transformations in SSIS Data Flow and Control Flow using For Loop Containers and Fuzzy Lookups.
- Used Power BI Power Pivot to develop data analysis prototypes and used Power View and PowerMap to visualize reports.
- Created new ETL packages to validate, extract, transform, and load data into data warehouse and data mart databases using SSIS.
- Created DAX calculated columns in Power Pivot worksheets to extract, import, and join data from different sources.
- Created Power Automate flow to copy new files from OneDrive for Business to Azure Blob Storage.
- Worked on migrating reports from Excel, Tableau, and Cognos to Power BI.
- Implemented Performance Tuning and Query Optimization.
- Expert in creating complex Crystal Reports including Ad Hoc Reports, Frequency Reports, Summary Reports, Drill-Down, Dynamic Grouping, Graphical, and Aging reports.
- Generated ad-hoc reports in Excel Power Pivot and shared them via Power BI with decision-makers for strategic planning.
- Implemented Copy activity and Custom Azure Data Factory Pipeline Activities.
- Primarily involved in Data Migration using SQL, Azure SQL, Azure Storage, Azure Data Factory, SSIS, and PowerShell.
- Extracted, Transformed, and Loaded data from source systems to Azure Data Storage services using Azure Data Factory, T-SQL, Spark SQL, and U-SQL Azure Data Lake Analytics; performed data ingestion into Azure Data Lake, Azure Storage, Azure SQL, Azure DW, and processed data in Azure Databricks.
- Created Pipelines in ADF using Linked Services, Datasets, and Pipelines to Extract, Transform, and Load data from Azure SQL, Blob Storage, Azure SQL Data Warehouse, and write-back tools.
- Architected and implemented medium-to-large-scale BI solutions on Azure using Azure Data Platform services including Azure Data Lake, Data Factory, Data Lake Analytics, Stream Analytics, and Azure SQL DW.
- Designed and implemented migration strategies for traditional systems on Azure using Lift-and-Shift and Azure Migrate approaches.
- Created ETL pipelines in and out of the data warehouse using Python and Snowflake SnowSQL, writing SQL queries against Snowflake.
- Expert in creating custom visualizations and developing Power BI Dashboards with a rich visual look.
- Proficient in designing and developing dashboards using Tableau visualizations including Dual Axis, Bar Graphs, Scatter Plots, Pie Charts, Heat Maps, Bubble Charts, Tree Maps, Funnel Charts, Box Plots, Waterfall Charts, and Geographic Visualizations with actions, local, and global filters.
- Experienced in building various dashboards in Tableau Server using sources such as SAP HANA, SQL Server, Teradata, and Oracle.
- Created custom visuals using Python and R integrated into Power BI.

Environment: SQL Server 2016, SSIS, SSRS, SSAS, Alteryx Designer, Power BI Desktop, Power BI Service, Power BI Pro, Tableau Desktop, Tableau Server, Excel, Power Query, Power Pivot, Python, Azure Suite, Snowflake

Sr. Power BI Developer — Sales Effectiveness Team

04/2019 – 01/2020

Johnson Controls, Inc. | Boca Raton, FL

- Created DSV, Cubes, and Dimensions; developed DMX/MDX queries for SSAS Reports.
- Worked on extracting, transforming, and loading data using SSIS Import/Export Wizard.

- Created Tables, Stored Procedures, and user-defined functions; created SQL scripts for tuning and scheduling.
- Used Alteryx Designer application to pull data from Workday.
- Created SharePoint sites used by stakeholders to update data for different regions.
- Pulled data from Jira using REST API and third-party drivers; created visuals for directors to measure team performance.
- Created designs and process flows to standardize Power BI Dashboards to meet business requirements.
- Developed visual reports, dashboards, and KPI scorecards using Power BI Desktop.
- Developed, identified, designed, built, tested, optimized, and maintained a Data Warehouse and OLAP Cube using the full Microsoft BI Stack including SSIS, SSAS, and SSRS.
- Created different roles for users accessing the Tabular Model; wrote complex DAX functions to implement Row-Level Security and applied rules for business users assigned to various roles.
- Highly proficient in creating SQL Server Reports, handling sub-reports, and writing queries to perform Drill-Through and Drill-Down operations in SSRS.
- Extracted, Transformed, and Loaded data from source systems to Azure Data Storage services using Azure Data Factory, T-SQL, Spark SQL, and U-SQL Azure Data Lake Analytics; performed data ingestion into Azure Data Lake, Azure Storage, Azure SQL, Azure DW, and processed data in Azure Databricks.
- Created Pipelines in ADF using Linked Services, Datasets, and Pipelines to Extract, Transform, and Load data; hands-on experience creating and deploying SSAS cubes using Star Schema and Snowflake Schema.
- Involved in data cleansing to remove unnecessary columns and eliminate redundant and inconsistent data using SSIS transformations.
- Used Power Query to acquire data and Power BI Desktop for designing rich visuals.
- Proficient in Python and R.

Environment: SQL Server 2016, SSIS, SSRS, SSAS, Alteryx Designer, Power BI Desktop, Power BI Service, Excel, Power Query, Power Pivot, Python, R

Sr. Power BI Developer

11/2018 – 03/2019

Panasonic Avionics Corporation | Lake Forest, CA

- Gathered requirements from Directors and created functional documentation using Confluence.
- Maintained reports in Power BI Service and shared them with team members across the organization.
- Experienced in Power BI Admin functions including creating content packs, monitoring user access to dashboards, and managing Power BI Pro licenses.
- Used Power BI Power Pivot to develop data analysis prototypes and used Power View and Power Map to visualize reports.
- Designed and developed Power BI dashboards and reports, and published them to Power BI sites.
- Integrated Power BI reports into other applications using embedded analytics via Power BI Service (SaaS) and API automation; developed custom visuals for Power BI.
- Involved in migrating data from Amazon Redshift to Snowflake.
- Experienced with SQL Server Reporting Services (SSRS) to author, manage, and deliver both paper-based and interactive web-based reports.
- Generated reports with parameters, sub-reports, cross-tabs, and charts using Crystal Reports.
- Proficient in SSIS Control Flow items (For Loop, Execute Package/SQL Tasks, Script Task, Send Mail Task) and SSIS Data Flow items (Conditional Split, Data Conversion, Fuzzy Lookup, Fuzzy Grouping, Pivot).
- Migrated Excel reports (dataset size ~5 million rows) to Power BI Desktop.
- Experienced in building SSIS packages (.dtsx) for ETL processes, extracting data from flat files, Excel files, and legacy systems and loading into SQL Server.
- Created Write-Back functionality in SSAS to write data back to the cube, allowing changes to return to the cube.
- Created an internal application to access dashboards using C# and .NET Frameworks.

Environment: MS SQL Server 2014/2012, SSRS, SSIS, Power BI Desktop, Power BI Service, Power Query, Power Pivot, TFS, Visual Studio 2015, DAX Studio, SSAS, T-SQL, Crystal Reports, SQL Profiler, XML, MS Excel

SQL BI / Power BI Developer

01/2017 – 10/2018

CareMore Health System | Cerritos, CA

- Used Power BI Power Pivot to develop data analysis prototypes for advanced visualization reports.

- Designed and developed SSIS Packages to import and export data from MS Excel, SQL Server, and Flat files.
- Involved in gathering requirements for data deliverables to ensure an understanding of their purpose and provide a technical perspective on requirements.
- Worked on Tabular Model and imported it into Power BI.
- Created designs and process flows to standardize Power BI Dashboards to meet business requirements.
- Published Power BI Reports to required workspaces and made Power BI Dashboards available in web clients and mobile apps.
- Created Bar charts and Column charts in Power BI using SQL Server as the data source.
- Developed Dashboards per business needs using the Power BI tool.
- Automated the creation of Excel pivot tables from SAS datasets using SAS Macro and VBA.
- Proficient in Python.
- Developed data models, SQL coding, SQL query tuning, and schemas.
- Created multiple visualizations using Power BI.
- Created Package Configurations to deploy packages from development to production server.
- Designed tabular, matrix, drilldown, drill-through, parameterized, and linked reports in SQL Reporting Services (SSRS).
- Defined datasets with joins and sub-queries for complex queries involving multiple tables in Power BI.
- Used Power BI Service Pro license to create and publish dashboards.
- Installed and configured Enterprise Gateway and Personal Gateway in Power BI Service.
- Assisted with implementation and upgrade of AutoSys and JAWS; troubleshoot errors and maintained documentation and procedures.
- Designed Cubes with Star Schema using SQL Server Analysis Services 2012 (SSAS).
- Developed a large number of standard and customized reports using SSRS for data feeds and server-based reports.
- Conducted database management, performance measurement, and performance tuning for new and existing databases using SQL Profiler and SQL Analyzer.
- Implemented cell-level security in cubes using MDX expressions to restrict users of one region from viewing data of another region.

Environment: MS SQL Server 2014/2012, SSRS, SSIS, Power BI Desktop, SharePoint, TFS, Visual Studio 2015, DAX Studio, SSAS, C#.NET, T-SQL, SQL Profiler, XML, MS Excel

SQL BI / Power BI Developer

10/2015 – 12/2016

Sephora IT | San Francisco, CA

- Coordinated with the front-end design team to provide necessary stored procedures, packages, and data insights.
- Worked on SQL Loader to load data from flat files obtained from various facilities daily.
- Developed Power BI reports and dashboards from multiple data sources using data blending.
- Optimized performance of queries by modifying T-SQL queries, removing unnecessary columns, and eliminating redundant and inconsistent data.
- Responsible for creating Databases, Tables, Cluster/Non-Cluster Indexes, Unique/Check Constraints, and Views.
- Created PL/SQL stored procedures, functions, and packages for moving data from the staging area to the data mart.
- Scheduled jobs for creating snapshots of Power BI Reports and Dashboards, and troubleshoot datasets for Power BI sites.
- Built visualizations using Power BI Desktop.
- Published Power BI reports to Power BI Service and pinned reports to dashboards.
- Created data models using Power BI Desktop and Power Pivot.
- Created Report Filters using Power BI Desktop.
- Implemented Role-Based Security in Power BI Service.
- Created Power BI Visualizations and Dashboards per business requirements.
- Configured and maintained Report Manager and Report Server for SSRS.
- Restricted user access by creating security roles in Power BI.
- Created SQL datasets for Power BI and Ad-hoc reports.
- Scheduled SSIS package services to run at different intervals to fetch and transfer data into another database.

- Created Package Configuration files to support SSIS packages across different environments.

Environment: *SQL Server 2012/2008R2, .NET Framework, XML, T-SQL, SSIS, SSRS, SSAS, Visual Studio .NET, ASP, MS Excel, MS Access, TFS 2010, PL/SQL, Oracle Database 11g, Shell Scripts, UNIX*

SQL MSBI Developer

09/2013 – 08/2015

HSBC Bank | Hyderabad, India

- Worked closely with Business Analysts to produce all required documentation.
- Worked with the Product Development Team to architect Database Design and strategy.
- Worked with Business Users to architect Data Warehouse strategy based on reporting, analytical, and dashboard requirements.
- Created reports in Power BI using the SSAS Tabular model via Analysis Connector.
- Developed database objects including Stored Procedures, Functions, Tables, Triggers, and Indexes using T-SQL and SQL Analyzer.
- Created insert, update, and delete triggers on tables to capture DML activities on crucial and confidential data.
- Developed SSIS packages to export and import data from SQL Server to Access, Text, and Excel files; configured SQL Mail Agent for automated email notifications.
- Involved in deploying, configuring, and managing reports using Report Manager and Report Builder.
- Reviewed and fine-tuned stored procedures and triggers prior to production migration.
- Scheduled SQL Agent Jobs to execute stored SSIS packages that updated the database on a daily basis.
- Created SSIS packages to load data from Flat Files to the Data Warehouse and Report Data Mart using Lookup, Derived Columns, Sort, Aggregate, Power Pivot Transformation, and Slowly Changing Dimension.
- Developed entity-relationship diagrams and data dictionaries for project coordination; created SQL create, alter, and insert scripts.

Environment: *MS SQL Server 2012/2008, SSIS, T-SQL, C#, .NET, ASP, Tableau, Performance Point, Visual Studio 2010, MS Access, Excel, SQL Profiler*
