

MOHIT SAINI

DevOps, AI-Driven Automation & Quality Engineering Leader | Cloud & CI/CD Transformation | 18+ Years

Executive Snapshot

- Experienced in managing global engineering teams, strategic hiring, capability building, and fostering a culture of automation-first and AI-enabled quality engineering.
- DevOps & Automation Manager with proven success at Landis+Gyr, delivering 70% reduction in manual testing through scalable automation frameworks. Expert in CI/CD, Agile/Scrum, and cloud-driven delivery. Skilled in integrating AI-powered testing, ML-based insights, and generative-AI automation to boost engineering efficiency, quality, and release velocity. Strong team leadership, stakeholder collaboration, and metrics-driven execution.
- 18+ years in Software Engineering, QA Automation & DevOps
- Automation-led quality transformation leader (70% manual reduction)
- Delivered CI/CD + Cloud migration across GCP ecosystem
- Led global engineering delivery across US, EMEA & APAC
- Pursuing AI & Data Science specialization — applying ML & LLMs to QA/DevOps
- Focused on Intelligent Automation, Cloud Engineering & GenAI adoption

Areas of Expertise

- | | |
|--|---|
| <ul style="list-style-type: none">• Programming & Scripting: Python, SQL, Bash, Java, JavaScript/TypeScript• Test Automation: Robot Framework, Selenium, Playwright, Pytest, JMeter, Postman, BDD (Cucumber/Behave)• AI & ML: Pandas, NumPy, Scikit-Learn, LangChain, HuggingFace, Prompt Engineering, LLM Automation, AI-based test automation, Predictive analytics, Generative AI tools (ChatGPT, Claude, Gemini, Copilot)• Cloud & DevOps: Google Cloud Platform, Azure DevOps, Docker, Kubernetes, Helm, GitLab CI, Jenkins, Ansible, SonarQube, Git | <ul style="list-style-type: none">• Methodologies: Agile (Scrum), SAFe, TDD, Shift-Left Testing, OKRs• Project & Collaboration Tools: JIRA, Confluence, MS Project, Wiki• Analytics & Visualization: Power BI, Advanced Excel |

Experience

Manager | Software Development | Landis Gyr - Noida | 04/2017 - 08/2025

- Led and mentored a cross-functional QA team of over 20 engineers, ensuring the timely delivery of high-quality software products.
- Integrated testing into CI/CD pipelines in collaboration with Development, Product, and DevOps teams (Ansible, Docker, Jenkins, Kubernetes, and Helm Charts).
- Managed end-to-end testing activities, including functional, regression, integration, API, and UAT testing.
- Introduced metrics-driven quality practices and dashboards to monitor defect trends, team performance, and enable transparent stakeholder engagement.
- Implemented real-time dashboards and KPI reporting, improving stakeholder transparency, reducing status-update inquiries by 50%, and boosting executive confidence.
- Standardized user story estimation using templated breakdowns, achieving 90% accuracy between T-shirt sizing and actual effort, reducing sprint planning variance by 30%.
- Mentored and coached three Scrum Masters, improving team velocity by 20%, and enhancing sprint predictability.

- Facilitated architectural and system design workshops, reducing technical debt by 40%, and fostering collaboration across engineers, architects, and product owners.
- Championed continuous process improvements to optimize test cycles, reduce defect leakage, and strengthen delivery confidence.
- Drove the adoption of automation frameworks (Selenium, Robot Framework), reducing manual testing effort by 70%, automating over 3,700 test cases, boosting regression coverage by 85%, and cutting test-cycle time by 60%.
- Successfully led the migration of Command Center and Advanced Load Management products to GCP, transitioning 40+ customers from on-premise, with zero service disruption.
- Introduced generative AI workflows for test case generation, defect analysis, and documentation automation, improving QA productivity by 25% and reducing manual review cycles.

Technical Lead | Landis Gyr - Noida | 09/2013 - 03/2017

- Led cross-functional Development, SQA, and Delivery teams, optimizing effort estimation, task allocation, and status reporting to improve project delivery efficiency.
- Collaborated with business stakeholders to gather requirements, identify system gaps, and define functional enhancements.
- Delivered high-quality, end-to-end projects by mentoring teams, fostering collaboration, and driving process improvements.
- Revamped TFS testing processes and enhanced functional test suites, significantly improving test coverage and reducing defect leakage.
- Implemented JMeter-based performance testing frameworks, analyzing system scalability, load, and stress metrics to optimize application performance, and ensure production readiness.
- Reduced onboarding time by 40% through digital training programs, FAQ portals, and structured learning paths for new hires.
- Bagged the Technical Excellence Award.

Team Lead QA & Release | Hungama Digital | 01/2012 - 08/2013

- Revamped QA processes and enhanced functional test suites, introducing structured test design practices that improved test coverage and significantly reduced defect leakage, resulting in higher release quality and stronger stakeholder confidence.
- Led cross-functional teams in effort estimation, task allocation, and status reporting, streamlining collaboration between Development, QA, and Delivery teams, improving delivery efficiency, and ensuring on-time project completion.

QA Engineer | Tribal Fusion (VDX.tv) | 03/2010 - 01/2012

- Developed and executed test plans for web-based advertising solutions.
- Documented testing processes and maintained comprehensive test documentation.

Software Engineer | PlusFourSix AB | 06/2007 - 02/2010

- Conducted functional, regression, and performance testing on applications.

Education

IIT Roorkee | IHUB DivyaSampark | Expected in 02/2026
Executive Post Graduate: Data Science & Artificial Intelligence

University of Brussels | United Business Institute | 06/2013
MBA: Information Technology

G.B. Pant University of Agriculture And Technology | Pantnagar | 06/2007
B.Tech: Computer Science

- SAFe 6 Agilist (Certified)
- Certified Scrum Master (CSM)
- Generative AI Foundations - UpGrad / Microsoft
- Cloud Computing & DevOps - Intellipaat
