PROFESSIONAL SUMMARY

Enterprise Apple platform engineer with 12+ years of experience designing, securing, and managing large-scale macOS and iOS environments. Certified Jamf Pro administrator with a proven record of leading high-impact deployments, remediating critical vulnerabilities, and optimizing device management for organizations ranging from universities to Fortune 100 enterprises.

PROFESSIONAL EXPERIENCE

Lead Jamf Engineer (DevOps)

April 2025 – February 2026

Sans – Subcontracted to Infosys/T-Mobile, Frisco, TX

- Validate, test, and implement engineering change requests for nationwide retail systems supporting T-Mobile's sales operations.
- Manage and support ~85,000 iPads and ~9,000 macOS devices across production retail environments.
- Provide backend engineering support for highly customized Jamf-managed provisioning systems.
- Ensure stable, compliant, and predictable rollouts of updates and configuration changes.
- HCL America – Contracted to Experian, Allen, TX

Sr. Vulnerabilities Agent

February 2024 – March 2025

Digital Workplace Team

- Identified, prioritized, and remediated macOS vulnerabilities across ~7,000 devices.
- Developed custom scripts and Jamf policies for secure software updates.
- Leveraged Jamf Patch Management to automate application deployment.
- Collaborated with Engineering and Architecture teams to maintain compliance.
- TEKsystems – Contracted to HNI Corporation

Sr. Jamf Engineer

August 2023 – December 2023

Digital Workplace Team

- Provided full Jamf Pro administration across all business units.
- Reconciled ABM devices, configured specialized iPads, and maintained Jamf software repositories.
- Optimized configuration profiles, policies, and distribution triggers.
- Ensured InfoSec compliance and assumed full Jamf system ownership.
- Apex Systems – Contracted to Saint Louis University

Sr. Jamf Engineer

April 2023 – June 2023

Information Technology Services

- Modernized Jamf environment and improved automation workflows.
- Trained junior administrators to assume senior-level responsibilities.
- Enhanced policy structure, profile hygiene, and Okta integration.
- Delivered documentation and best practice guidance for large-scale Apple device management.

macOS Engineer, Technology & Operations

June 2022 – January 2023

Sabre Corporation, Southlake, TX

- Managed macOS devices via Microsoft Endpoint Manager and Apple Business Manager.
- Authored documentation for onboarding, restoration, and upgrade workflows.
- Maintained Intune configuration and compliance policies for all corporate MacBook Pro devices.
- Provided macOS operational recommendations to senior leadership.

KEY PROJECTS

& Accomplishments

- Managed up to 85,000 iOS devices and nearly 10,000 macOS systems across enterprise environments.
 - Executed secure, compliant updates and configuration changes with minimal disruption.
 - Built automated remediation workflows for CVE-affected applications (Apache Commons-Text, VMware)
- Spring Beans, Azul Zulu OpenJDK, Oracle JRE).
- Led full lifecycle Jamf Connect implementation and documentation at UTA.
 - Directed Jamf Pro Cloud migration including cleanup, database extraction, and DNS coordination.
 - Delivered annual macOS certification testing, documentation, and upgrade planning.
 - Managed yearly packaging cycles

- Implemented browser security hardening disabling built-in password managers across all major browsers.
