PROFESSIONAL SUMMARY

Results-driven Full-Stack Engineer with 7.5+ years of experience architecting and delivering scalable web applications, REST/GraphQL APIs, and cloud-native solutions. 5+ years of hands-on AI/GenAI development experience spanning LLM integrations, RAG pipelines, and AI-powered products. Proven track record leading cross-functional teams, managing end-to-end SDLC, and deploying 10+ production-grade applications across AWS, Node.js, Python, React.js, and TypeScript stacks. PG Diploma in AI & ML from IIIT Bangalore.

PROFESSIONAL EXPERIENCE

• Remote

Jan 2025 – Present

BPme Loyalty Core Service (BP Global — Millions of Users)

- Spearheading development of BPme Rewards loyalty platform serving millions of users across multiple geographies; features include personalized offers, digital fuel payments, and real-time reward tracking.
- Architected scalable API integrations with payment gateways and loyalty platforms, reducing transaction latency
- Led security optimization and performance tuning ensuring seamless loyalty point accrual and redemption at Conducted usability testing cycles; improvements drove measurable uplift in customer satisfaction scores.
- Tech: Node.js, React.js, TypeScript, AWS, DynamoDB, GraphQL, Docker, Kubernetes, Agile/Jira

• Senior Full-Stack & Cloud Developer

Jun 2022 – Jun 2024

Blazecan Technology Pvt Ltd • Pune

- Bolttech Malaysia — World's Largest Insurance Exchange Platform
- Built agent desktop interface for customer service operations on AWS Connect, enabling real-time policy management for insurance distributors across Asia.
- Designed and implemented GraphQL APIs consumed by React.js front-end, cutting data over-fetching by 40%.
- Developed MERN + Python neural network application (Cashify-like) for used mobile price prediction using ML regression models.
- Tech: React.js, Node.js, TypeScript, AWS (Lambda, DynamoDB, App Sync, CloudWatch, Amazon Connect), GraphQL, Docker, Kubernetes
- Senior Full-Stack Engineer | Tatvic Analytics

• Ahmedabad (WFH)

Jun 2021 – Jun 2022

Shopify–Google/Facebook Integration Application

- Founded and led a dedicated Shopify + Google plugin development team from ground zero.
- Built Google Merchant Center ↔ Shopify sync for products, orders, inventory, and locations; integrated Google
- Ads Campaigns & PMax management APIs.
- Architected React app with hooks/functional components achieving 2x performance improvement; applied OOP patterns to reduce codebase by 50%.
- Implemented Shopify webhook queue management (RabbitMQ) for high-reliability order sync.
- Tech: Node.js, React.js, Next.js, MongoDB, MySQL, GraphQL, AWS, TypeScript, Docker, Kubernetes

• Senior Full-Stack Developer | Cedcross Technologies

May 2017 – Jun 2021

E-Commerce Marketplace Integration Platform (7+ apps)

- Led a team of 15+ developers building marketplace integration apps for BestBuy Canada, Walmart Canada,
- Etsy, Catch, OnBuy — serving 5K+ active users.
- Designed one-click product import from Shopify to marketplace platforms and real-time order/inventory sync
- Applied TDD, peer reviews, and clean code practices; enforced non-redundant architecture standards across all

KEY PROJECTS

•

► Tech: PHP, Yii2, Node.js, React.js, MongoDB, MySQL, Shopify APIs, AWS Lambda, GraphQL,

- 2025
 - ▶ Built end-to-end AI medical chatbot using Retrieval-Augmented Generation (RAG); ingested medical documents
 - into Pinecone vector DB for semantic search-powered Q&A via GPT-4.
 - ▶ Full CI/CD pipeline: GitHub Actions → Docker image build → AWS ECR → EC2 deployment with zero-downtime
 - releases.
 - ▶ GitHub: github.com/kashifakhan1996/Medical-Chatbot-Generative-AI
- AI Resume Parser — NLP Extraction Engine

Tech Stack: Python, LangChain, GPT-4, SpaCy, Flask, React.js, MongoDB
- 2025
 - ▶ Intelligent resume parsing system extracting structured data (skills, experience, education, contacts) from
 - PDF/DOCX resumes using LLM-based NER and GPT-4 prompts.
 - ▶ Achieved 92%+ extraction accuracy; REST API consumed by React.js HR dashboard with bulk upload, skills
 - gap analysis, and ATS candidate ranking.
- Product Quality Prediction Model (Wine Quality ML)

Tech Stack: Python, LangChain, Flask, GPT, Pinecone, AWS ECR/EC2, Docker, GitHub Actions
- 2024
 - ▶ End-to-end ML pipeline for product quality prediction; trained regression model with feature engineering,
 - deployed as Flask REST API on AWS.
 - ▶ AWS CI/CD via GitHub Actions → Docker → ECR → EC2 with automated rollback on test failure.
 - ▶ GitHub: github.com/kashifakhan1996/End-To-End-Wine-Quality
- BPme Loyalty Core Service — BP Global

Tech Stack: Node.js, React.js, TypeScript, AWS, DynamoDB, GraphQL, Docker, Kubernetes
- 2025–Present
 - ▶ Loyalty and payments platform for BP serving millions of users; personalized offers, digital fuel payments, and
 - real-time reward tracking across multiple geographies.
 - ▶ Implemented scalable API integrations with payment systems and loyalty platforms, improving transaction speed
 - by 30%.
- Bolttech Agent Desktop — Insurance Exchange Platform

Tech Stack: React.js, Node.js, TypeScript, DynamoDB, GraphQL, AWS Connect, Lambda, CloudWatch, Docker
- 2022–2024
 - ▶ Built agent desktop for the world's largest insurance exchange (Bolttech Malaysia) connecting providers,
 - distributors, and customers across APAC.
 - ▶ Developed GraphQL APIs and React.js front-end for real-time policy management; reduced data over-fetching
 - by 40%.
- BestBuy Canada — Shopify Integration App

Tech Stack: Node.js, React.js, MongoDB, GraphQL, AWS, TypeScript, Shopify APIs
- 2018–2019
 - ▶ Launched integration app with 5,000+ active users; real-time product, order, and inventory sync between Shopify
 - and BestBuy CA marketplace.
 - ▶ Built one-click product import feature; extended same architecture for Catch–Shopify integration.
 - ▶ Applied OOP patterns in Express & React utils, cutting codebase size by 50% and improving maintainability.
- Facebook & Google Feed — Shopify Integration App

- Built Shopify–Google/Facebook integration app enabling full product, order, inventory, and location sync across
- platforms.
- Developed Node.js APIs and full-stack Shopify apps; managed end-to-end SDLC including reporting,
- troubleshooting, and live project management.
- Collaborated directly with clients to deliver custom features and performance improvements.
- Local Dekho — Service Booking Application**
 2021 Tech Stack: React.js, Node.js, MongoDB, GraphQL, Next.js, Express, TypeScript, AWS, Firebase, Google Maps API
- Built hyperlocal service booking platform connecting users with nearby helpers (plumbers, electricians, etc.)
- using location-based filtering.
- Implemented Firebase mobile number OTP login, React hooks/polling for real-time notifications, and Google
- Maps APIs for geo-based service discovery.
- Live: localdekho.netlify.app
- Real Real Estate — Property Listing Platform**
 Tech Stack: React.js, Node.js, MongoDB, GraphQL, Next.js, Express, TypeScript, AWS
- 2020
- Built full-featured real estate platform with admin panel for property/category/location management, analytics
- dashboard, and advanced property search & filter.
- Implemented property detail pages, agent property upload sections, and social media sharing across multiple
- platforms.
- Live: realrealestate.in
- Savings Tracker — Personal Finance Application**
 Tech Stack: React.js, Node.js, DynamoDB, GraphQL, TypeScript, AWS, Docker, Kubernetes
- 2021–2022
- Developed full-stack savings and expense tracker with visual analytics (charts/graphs) showing expenses vs.
- savings over time.
- Deployed on AWS with serverless architecture; real-time data sync via GraphQL subscriptions.
- Live: savings-tracker-111.netlify.app
- Price Prediction — Used Mobile Phones**
 Tech Stack: Python, MERN Stack, Neural Network, Machine Learning, AWS
- 2023–2024
- Built Cashify-like web application that predicts resale price of used mobile phones based on device
- specifications using a trained neural network model.
- End-to-end pipeline from data ingestion to model training (regression), REST API serving, and React.js frontend
- for user interaction.
- Walmart Canada — Shopify Integration App**
 Tech Stack: PHP, Yii2, Node.js, React.js, MySQL, MongoDB, Shopify APIs, AWS Lambda
- 2018
- Developed Walmart Canada marketplace integration enabling sellers to sync Shopify catalogue, manage orders,
- and update inventory in real time.
- OnBuy — Marketplace Integration App**
 Tech Stack: PHP, Yii2, Node.js, React.js, MySQL, MongoDB, Shopify APIs
- 2017–2018

- **between Shopify and OnBuy platform.**

- **Catch — Marketplace Integration App**

Tech Stack: Node.js, React.js, MongoDB, GraphQL, AWS, TypeScript, Shopify APIs

- **2019–2020**

- **► Developed Catch.com.au (Australia) marketplace integration; extended one-click product import feature from**
- **BestBuy Canada architecture to Catch platform.**
- **Etsy — Ecommerce Integration App**
Tech Stack: Node.js, React.js, MongoDB, GraphQL, AWS, TypeScript, Shopify APIs
- **2020–2021**
- **► Built Etsy–Shopify integration enabling sellers to manage listings, sync orders, and automate inventory updates**
- **between both platforms.**
