

Christopher Cotter

Senior Jamf Pro Engineer | macOS Systems Engineer | Apple Platform Specialist
Bedford, TX • (817) 403-8245 • chris.cotter@cotterville.net

Professional Summary

Enterprise Apple platform engineer with 12+ years of experience designing, securing, and managing large-scale macOS and iOS environments. Certified Jamf Pro administrator with a proven record of leading high-impact deployments, remediating critical vulnerabilities, and optimizing device management for organizations ranging from universities to Fortune 100 enterprises.

Core Competencies

- Jamf Pro Administration & Automation
- macOS/iOS Engineering & Deployment
- Vulnerability Remediation & Patch Management
- Apple Business Manager / Apple School Manager
- Configuration Profiles, Policies, PreStages
- Cloud Migrations (Jamf Cloud, ABM/ASM)
- Scripting: Bash, Zsh, Python (light)
- Intune/MEM macOS & Android Management
- Change Management in High-Risk Environments
- Cross-functional Collaboration & Technical Documentation

Professional Experience

Sans – Subcontracted to Infosys/T-Mobile, Frisco, TX

Lead Jamf Engineer (DevOps) | April 2025 – February 2026

- Validate, test, and implement engineering change requests for nationwide retail systems supporting T-Mobile's sales operations.
- Manage and support ~85,000 iPads and ~9,000 macOS devices across production retail environments.
- Provide backend engineering support for highly customized Jamf-managed provisioning systems.
- Ensure stable, compliant, and predictable rollouts of updates and configuration changes.

HCL America – Contracted to Experian, Allen, TX

Sr. Vulnerabilities Agent, Digital Workplace Team | February 2024 – March 2025

- Identified, prioritized, and remediated macOS vulnerabilities across ~7,000 devices.
- Developed custom scripts and Jamf policies for secure software updates.
- Leveraged Jamf Patch Management to automate application deployment.
- Collaborated with Engineering and Architecture teams to maintain compliance.

TEKsystems – Contracted to HNI Corporation

Sr. Jamf Engineer, Digital Workplace Team | August 2023 – December 2023

- Provided full Jamf Pro administration across all business units.
- Reconciled ABM devices, configured specialized iPads, and maintained Jamf software repositories.
- Optimized configuration profiles, policies, and distribution triggers.
- Ensured InfoSec compliance and assumed full Jamf system ownership.

Apex Systems – Contracted to Saint Louis University

Sr. Jamf Engineer, Information Technology Services | April 2023 – June 2023

- Modernized Jamf environment and improved automation workflows.
- Trained junior administrators to assume senior-level responsibilities.
- Enhanced policy structure, profile hygiene, and Okta integration.
- Delivered documentation and best practice guidance for large-scale Apple device management.

Sabre Corporation, Southlake, TX

macOS Engineer, Technology & Operations | June 2022 – January 2023

- Managed macOS devices via Microsoft Endpoint Manager and Apple Business Manager.
- Authored documentation for onboarding, restoration, and upgrade workflows.
- Maintained Intune configuration and compliance policies for all corporate MacBook Pro devices.
- Provided macOS operational recommendations to senior leadership.

University of Texas at Arlington, Arlington, TX

Sr. Systems Configuration Analyst, Endpoint Management | January 2016 – June 2022

- Principal Jamf Administrator for all macOS/iOS deployment, packaging, policies, and PreStages.
- Led Jamf Connect rollout, Jamf Pro Cloud migration, and annual macOS certification cycles.
- Managed AD, Azure AD, Autopilot, and MEM for Windows and Android environments.
- Directed COVID-era lab redesigns, ensuring compliant and fully provisioned macOS lab environments.
- Created documentation for Apple image recovery, enrollment, and Intel/Apple Silicon configuration.

Projects & Accomplishments

- Managed up to 85,000 iOS devices and nearly 10,000 macOS systems across enterprise environments.
- Executed secure, compliant updates and configuration changes with minimal disruption.
- Built automated remediation workflows for CVE-affected applications (Apache Commons-Text, VMware Spring Beans, Azul Zulu OpenJDK, Oracle JRE).
- Led full lifecycle Jamf Connect implementation and documentation at UTA.
- Directed Jamf Pro Cloud migration including cleanup, database extraction, and DNS coordination.
- Delivered annual macOS certification testing, documentation, and upgrade planning.
- Managed yearly packaging cycles for Office 365, Adobe CC, browsers, SolidWorks, and MATLAB.
- Implemented browser security hardening disabling built-in password managers across all major browsers.

Education

Bachelor of Science, Information Technology — Columbia Southern University
Summa Cum Laude, 4.0 GPA — Omega Nu Lambda Honor Society

Technical Certifications

- Jamf 300 (CCA)
- Apple Certified Technical Coordinator
- Apple Certified Support Professional
- JumpCloud Core
- Linux Professional Institute
- CompTIA
- Microsoft MCP
- CIW
- FEMA NIMS (IS-100.b, 200.b, 700.a, 800.a, 750)

Additional Qualifications

- Amateur Radio Extra Class Operator
- W5YI & ARRL Instructor/Examiner
- NOAA Skywarn Basic & Advanced
- Authorized Commercial Examiner
