PROFESSIONAL SUMMARY

Experienced Senior Project Manager with expertise in IT infrastructure, cloud migration, ERP implementations, product development, Waterfall, Agile methodologies, and SDLC. Successfully led the delivery of major software products, resulting in a 25% increase in customer satisfaction, a 15% reduction in time-to-market, and a 30% decrease in project delays. Directed multiple IT projects focused on developing and deploying custom solutions, including cybersecurity software and ERP systems. Oversaw service-related functions such as risk management, problem resolution, and project tracking. Led end-to-end projects involving custom software development, integration, testing, and deployment. Implemented continuous improvement processes, CI/CD pipelines, and agile methodologies to enhance software development and deployment. Coordinated with third-party vendors to deploy and manage network infrastructure, ensuring robust and reliable connectivity for data centers and enterprise applications. Spearheaded the development and deployment of SaaS platforms, increasing market share and platform adoption. Certified SAFe 5.1 Agilist Lean Six Sigma Black Belt LSSBB® PMI Agile Certified Practitioner PMI-ACP® AWS Cloud Practitioner Certified AWS - CP

PROFESSIONAL EXPERIENCE

Senior Lead Project Manager

12/2021 - Present

Kyndryl Inc., Chicago, IL

- Managed full project lifecycles using Azure DevOps, Jira, and other tools for clients including Kaiser Permanente, Elevance Health, and American Airlines. This encompassed initiation, planning, analysis, design, development, risk/issues management, testing, and implementation.
- Managed multiple teams of architects and engineers, successfully delivering software products and achieving a 25% increase in customer satisfaction.
- Collaborated with stakeholders like Deloitte, NTT Data, and the State of Illinois on the IES Technical Refresh Program, minimizing impact on essential state services.
- Led an end-to-end ERP implementation of SAP S/4HANA, achieving go-live within the set timeline and budget.
- Directed a cybersecurity resiliency project for Kaiser Permanente, involving virtual machine separation and investigation at five National Datacenters.
- Coordinated hardware installation and deployment with HPE and Hemmersbach for Kaiser Permanente data centers.

IT Project Manager

03/2021 - 12/2021

IBM, Chicago, IL

- Administered a portfolio of initiatives across various business lines, utilizing both Waterfall and Agile methodologies.
- Prepared analytical reports, data visualizations, and other resources to support team decision-making.
- Managed a portfolio of complex initiatives spanning one or multiple lines of business with Waterfall and Agile methodologies.
- Defined project scopes and objectives, achieving a 97% alignment with stakeholders' expectations.
- Managed concurrent ERP implementation projects (Sage X3, SAP 4 HANA, Oracle NetSuite), ensuring adherence to schedules and budgets.
- Oversaw the implementation and migration of SAP ERP Phases 1 and 2 for an external client, transitioning from a mainframe-based system to the SAP ERP/financial suite.

IT Project Manager

08/2018 - 03/2021

Archsolve, LLC, Houston, TX

- Managed high-value projects with budgets over \$500K for clients like PepsiCo and UPS.
- Led end-to-end SAP S/4HANA implementations, supporting design, configuration, and testing of SAP FI/CO, MM, SD modules.
- Developed and deployed a custom NetSuite solution, including system integrations, data migration, program and user-acceptance testing.
- Created a cloud storage platform, increasing market share by 10%.
- Implemented user analytics, improving engagement by 15%.
- Collaborated on designing a scalable continuous delivery pipeline, enhancing deployment frequency by 25%.

● IT Program Management Consultant

07/2017 - 07/2018

Klay PM, Little Elm, TX

- ▶ Managed multiple projects concurrently, conducted chartering sessions, developed comprehensive project and resource plans, managed program communication, and enhanced project schedule quality through risk and issue management.
- ▶ Organized and facilitated daily stand-up meetings, sprint planning sessions, sprint reviews, retrospectives, and backlog refinement activities.
- ▶ Maintained and updated tracking tools and logs, including change control records, issue logs, decision/action logs, and risk management documentation.
- ▶ Monitored project timelines and milestones, ensuring that deadlines and quality standards were met by the project teams.
- ▶ Successfully migrated legacy systems to SAP S/4HANA for a manufacturing firm, resulting in a 50% improvement in process efficiency.
- ▶ Increased system adoption rates by 40% through effective training programs and stakeholder collaboration.

● Senior Project Manager

10/2008 - 06/2017

Zenith Bank Plc, Lagos, Nigeria

- ▶ Led innovative projects that enhanced the bank's financial services business through technology, creating new revenue streams. Notable projects include the development of a Mobile Banking App, Internet (Web) Banking Implementation, Banking Omnichannel Project, and an AI-Powered Banking Chatbot.
- ▶ Managed large-scale application development projects, such as core banking systems, payment gateways, and fraud detection systems. Collaborated with product owners to clarify requirements, validate assumptions, and gather feedback from stakeholders.
- ▶ Directed end-to-end application development projects for financial products, including online banking, trading platforms, and mobile applications. Oversaw the implementation of a chatbot, managing the planning, execution, and monitoring of project milestones and deliverables.
- ▶ Ensured compliance with financial regulations and industry standards throughout the project lifecycle. Executed the setup of the Billing Settlement Program (BSP) for major travel agencies that are Zenith Bank customers worldwide. Coordinated with IT, finance, and compliance departments to ensure alignment with business goals and regulatory requirements.
- ▶ Spearheaded the development of a SaaS platform that enabled integration with third-party services, resulting in a 35% increase in platform adoption. Ensured quality assurance testing was conducted to meet financial industry standards and requirements. Facilitated change management initiatives to ensure seamless transitions and effective user adoption of new applications.
- ▶ Managed the development and deployment of the E-payment platform (XPATH) with API (Application Programming Interface) integration for all new and existing E-commerce customers of Zenith Bank Plc.

KEY PROJECTS

● Management Professional Certification PMP®

Microsoft Certified Azure Fundamentals Certified ScrumMaster CSM® Certified Associate in Project Management CAPM® Certified Six Sigma Yellow Belt CSSYB® Information Technology Infrastructure Library Certification ITIL® V4 Foundation

● Forensic Collection of VM Data Project for Kaiser Permanente

Directed and coordinated a multidisciplinary team of engineers and architects to establish a cybersecurity resiliency initiative and develop cybersecurity software solutions for Kaiser Permanente.

● Data Governance Implementation Program for American Airline

As Program Lead and SAFe Agile expert at American Airlines, I implemented governance tools, change management strategies, and effective communication to improve business user experience.

● State of Illinois IES Tech Refresh

Coordinated infrastructure project management and technical support for the Illinois Integrated Eligibility System (IES) environment, ensuring minimal disruption to critical state services impacting health, safety, and revenue collection.

● ERP Implementations (SAP S4 HANA/Oracle NetSuite/SAGE X3/Microsoft Dynamics 365) for Various Clients

Led the development of Requirements Definition Documentation and the Architecture Design Document for global ERP system deployments across various organizations. Successfully led a \$12.5M global SAP implementation project for a Fortune 500 company, achieving a 30% reduction in operational costs with

● Collaborative Software Development Tools

Initiated projects to create a web-based collaborative platform for software teams, incorporating real-time editing and version control.

● Gen AI Implementation

Implemented a Generative AI auto-response generator for a client, which enhanced customer service operations, improved efficiency, and provided superior overall customer experience.
