AT A GLANCE

- 7+ Years of professional experience
- 5 Roles across different companies
- 2 Languages spoken

PROFESSIONAL SUMMARY

Full Stack Developer with 9+ years of experience architecting and delivering scalable web applications across fintech, EdTech, and enterprise sectors. Holds a Computer Engineering degree from UNICAMP — one of Brazil's top-ranked engineering schools. Proficient in modern JavaScript/TypeScript stacks (React, Next.js, Node.js, NestJS) and Python (FastAPI), with hands-on experience integrating AI APIs, government services, and cloud infrastructure (AWS, Docker). Known for taking ownership of full product cycles from frontend UX to backend architecture and CI/CD deployment. Bilingual English-Portuguese.

PROFESSIONAL EXPERIENCE

- Full Stack Developer

Cognitivo.AI

Mar 2023 – Nov 2024

 - Campinas, Brazil
 - Engineered a mission-critical route management system for armored vehicle fleets, handling real-time tracking, scheduling, and security protocols across multiple clients.
 - Delivered full-stack development of a job board platform and multiple landing pages, improving lead conversion for enterprise clients.
 - Built and maintained React.js and AngularJS frontends integrated with Python and NestJS backends, ensuring high performance and code quality across concurrent projects.
 - Collaborated cross-functionally with design and product teams using Figma and Scrum methodology to meet delivery milestones.
- Full Stack Developer

Grupo Assist

Nov 2024 – Nov 2025

 - Campinas, Brazil
 - Led full-stack development of a product management application for international import/export operations, implementing alignment with Brazil's NCM government classification system.
 - Integrated AI APIs for automated product categorization, reducing manual classification effort and improving accuracy for regulatory compliance workflows.
 - Built integrations with government APIs for customs and trade data, ensuring real-time synchronization with official classification databases.
 - Developed frontend with Next.js and backend services with PHP and NestJS in a regulated, data-sensitive environment.
- Full Stack Developer

R4Edu

Mar 2022 – Mar 2023

 - Campinas, Brazil
 - Developed a comprehensive school management and online courses platform supporting student enrollment, course delivery, and administrative workflows.
 - Built dynamic AngularJS frontend components and PHP backend services, delivering a seamless user experience for educators and students.
 - Implemented course content management features enabling institutions to create, manage, and distribute digital learning materials at scale.
- Freelance Full Stack Developer

Good Dollar

Feb 2022 – Mar 2022

 - Designed and implemented a localization feature for a cross-platform React Native application using a Node.js i18n library, enabling multi-language support.
 - Built and integrated a GitHub Actions CI/CD pipeline with the Crowdin API to automate translation file synchronization, eliminating manual handoffs between developers and translators.

- **Student Project Coordinator & President**

Mar 2018 – Feb 2022

GAMUX — UNICAMP Game Research and Development Group

- ▶ Campinas, Brazil
- ▶ Led and scaled a student game development organization at UNICAMP, growing the group's presence and activities over 4 years.
- ▶ Planned and facilitated weekly technical meetings, taught game development tools (Defold, Godot) to 20+ student members, and organized university-wide game jams and events.
- ▶ Secured sponsorships and partnerships for events, developing negotiation and stakeholder management skills alongside technical leadership.
