PROFESSIONAL SUMMARY

Results-driven Project, Program and Product Development Manager with 21+ years of overall experience delivering outcome-focused product solutions through cutting-edge technologies and strategic business processes. Experienced in managing both in-house and external customer projects and products. Highly experienced and certified Scrum Master and Agile Coach with a proven track record of leading Agile teams and supporting organizational transformations. With 5+ years of experience spanning roles from Scrum Master to Agile Project Manager and Coach, I bring a versatile skill set in facilitation, coaching, mentoring, and problem-solving to drive project success and embed Agile values within organizations. Conducted cost variance analysis and managed project budgets ranging from \$250K to \$1.5M, resulting in accurate financial forecasting. Proficient with a strong track record of successfully delivering projects on time and within budget. A seasoned software professional with in-depth expertise across Mobile, Healthcare, FinTech (Banking), Travel, Trading, and Sales domains. Served as the primary liaison between the engineering, design, and product teams, facilitating effective communication and ensuring alignment on project goals and priorities. Conducted regular stakeholder meetings to provide updates, gather feedback, and address concerns, resulting in a 95% stakeholder satisfaction rating.

PROFESSIONAL EXPERIENCE

Senior Technical Project Manager

October 2024 - Present

- Overseeing IT deliverables and leading engineering teams at CAT Digital projects that provide marketing and digital solutions for Caterpillar dealers and customers.
- Serving as a Scrum Master and Agile Coach, facilitating daily stand-ups to track project progress.
- Managing Java/J2EE technology projects in AWS Cloud environment.
- Overseeing sprint backlogs, including bug fixes and feature enhancements, ensuring efficient planning and execution. Tracking and triaging project tickets using tools like JIRA and Redmine.
- Led the creation and delivery of key project artifacts, including project plans, charters, scope statements, FSDs, design documents, and code reviews. Secured stakeholder sign-offs and managed end-to-end processes such as change requests, release/change management, implementation and rollback plans, warranty support, and post-deployment activities.
- Overseeing the team in establishing the infrastructure needed for the execution and maintenance of the application.

Associate Vice President (AVP- IT)

January 2024 - September 2024

- Oversaw all IT deliverables for in-house products (First Party) and customer projects (Third Party).
- Participated in evaluating RFPs and RFQs for customer bid execution.
- Act as a dependable and accountable servant-leader, I am passionate about building high-performing, cross-functional teams and optimizing systems to maximize value delivery.
- Led RAMS (Road Asset Management System) ERP Solutions of various Government Projects.
- Led healthcare product development using Java with Spring Boot, React, and AWS Cloud environments.
- Managed IT P&L, ensuring financial efficiency and resource optimization.

Senior Technical Manager

July 2020 - December 2023

- Served as an Architect/Senior Technical Manager for the Warehouse and Retail Suite of products at Blackbelt.
- Led product development from the ground up by architecting JavaFX-based solutions, migrating legacy .NET products.
- Coordinated with various internal and external teams to ensure seamless collaboration.
- Acted as the Scrum Master and Agile Coach for the agile and scaled agile programs of Blackbelt products.
- Managed a team of 15 engineers across Java/J2EE stack, Mobile Apps development, QA, database, and DevOps. Planned and delivered sprint-based product features on a weekly basis.
- Engaged with executive-level customers and their project teams to ensure alignment with business needs. Collaborated closely with the Sales team to address customer requirements from a technical standpoint.
