EDUCATION

Bachelor of Computer

Applications

Static Website Developer | June 2018
- Oct 2019

Curated index.html files using inline
css to frame static website views for
personal brand

Served 9+ US clients.

real-time SITL simulator, utilizing
WebSockets for 5Hz telemetry
updates and a custom Mission

Compiler to automate autonomous
flight workflows like grid and orbit
scans.

CERTIFICATIONS

- Introduction to Model Context Protocol
- Claude Code in Action
- ChatGPT Prompt Engineering for Developers, DeepLearning.AI
- Large Language Models with Semantic Search, DeepLearning.AI
- Fine-tuning Large Language Models, DeepLearning.AI
- LangChain Chat with Your Data, DeepLearning.AI
- Personal Details
- Address:: Pune, Maharashtra
- Date of Birth: 26th June 1996
- Languages Known: English, Hindi, Bengali

PROFESSIONAL EXPERIENCE

Sr. Software Developer (Full Stack - Backend - Web Development) Oct 2022 – Present

- Architect-ed an event-driven, serverless and scalable AWS ecosystem for Computershare's
- AutoGraph (A Legal-Tech & Fin-Tech Automation platform) that ensured a highly reliable and durable system in Node.js/Nest.js, PostgreSQL/TypeORM, Kafka, Redis handling automated corporate filings for 50 US states at a scale of 0.8M requests per day. Leveraged DynamoDB and Lambda to improve system reliability while ensuring top-tier code quality using SonarCloud analysis.
- Engineered an optimised predictive hearing-loss (React/Next.js, Nest.js, MySQL, AWS, Redis) app for Lucid Hearing (A Hearing Healthcare and Medical Devices web platform), leveraging a new reusable design system to cut development cycles by 40% while maintaining bespoke UX standards.
- Slashed Podium Audio (A Digital Entertainment platform) acquired Bookstat analytical dashboard latency by 60% and DB overhead by 35% by architecting Elasticsearch DSL APIs with advanced aggregations framed in Node.js/Nest.js, PostgreSQL, AWS, Kafka, Redis to power high- performance visualizations.
- Delivered a 90% functional enterprise-franchisee POS/KDS feature in just 3 months; engineered a full-stack Node.js/Nest.js, PostgreSQL/TypeORM, RabbitMQ, Redis backend app and, framed and optimised a React frontend client to streamline operations for Nigel POS (A hospitality Management platform).
- Accelerated deployments by 50% and achieved 99.9% uptime by architecting CI/CD pipelines via

Sr. Software Developer (Full Stack - Backend - Web Development) Jun 2022 – Sep 2022

- Designed a highly cohesive and least coupled system by spearheading the transition from a monolithic to a serverless microservice architecture (NestJS, GraphQL, AWS Lambda,
- DynamoDB, Kafka, Redis) leading a 5-member agile team.
- Boosted the NestJs app performance by mitigating memory leaks and cpu overheads detected during profiling and increased maintainability by 90% by implementing centralised logging, metric calculations on log analysis and service telemetry emissions;
- Leveled up system resiliency, durability and security by implementing circuit-breaker pattern and throttling within services and applying gateway rate limiting, identity check and authorisation to services.
- Reduced system errors by 50% implementing global exception filters and catching errors early via validation pipes, and TypeORM, DTO whitelisting and guards for vulnerability remediation.
- Streamlined processes engaging team into sprint planning,
