PROFESSIONAL SUMMARY

20+ Years of experience in Aerospace, Automotive & Rail industries in various Technical and Managerial roles in Manufacturing and Engineering services in the areas Tool Design, Fixture Design, Product Design, automation, Assembly line transfer, Sustainability, VAVE, Quality, procurement & vendor development, Supply chain, Cost Engineering & Project Management.

SKILLS

- Experience in the areas of Conceptual Design, Product Development, Reverse Engineering and Re-Engineering.
- Hands on experience in Product design of Sheet metal, Plastic & Die cast Parts.
- Tool Design of Press tools, plastic molds, Jigs & Fixtures and Die-casting dies.
- Hands on calculations/Standard parts selection like Fasteners, Clamps, Motors, Gears/ Pinions, Bearings, Chains/Sprockets, Extrusions, Linear guides, Sensors, Actuators & Pneumatic Cylinders.
- Good knowledge over Engineering Materials, Manufacturing processes, cutting tools, Heat Treatment & Mechanical testing.
- Working Knowledge of ASME Y14.5 drafting standards, GD&T and Tolerance Stack up
- Experienced in Engineering Change Management and well implemented ECN & Update of BOM.
- Knowledge of ISO, AS900, TS16949, ASTM Standards, IEC, REACH, ROHS & UL standards, TQM, TPM & Lean Practices.
- Good at Product/Tool Design and Tool Room activities, Vendor Development, Vendor Follow up, Trials & Part Approval.
- Hands on experience in CMM, inspection methods and Metrology Instruments.
- Good in applying DFMA, Why-Why analysis, 5S, Kaizen & Poka-yoke.
- Involved in NPD, Reverse Engineering, Prototype Mfg, VAVE Projects for various Engineering Products.
- Application knowledge on SPC tools to improve the process.
- Knowledge of PPAP, APQP, DFSS, DFMEA, PFMEA, Control Plan and Process flow.
- Thorough Knowledge in Multiple CAD tools like AutoCad, Creo, CatiaV5 & Solidworks.
- Experienced in Stress Analysis using Pro- Mechanica & Solid works.
- Hands on experience PDM & PLM Software's ENOVIA 3DCOM, Team Center & Wind chill
- Experience in Project planning, Cost Engineering, team management & co-ordination in Multi-disciplined Engineering environment.
- Cost conscious in Materials, Manufacturing & supply chain Management.
- Expertise in line transfer with safety, Quality, delivery & cost.

WORK EXPERIENCE

Organization	Designation	Duration	Segment/Domain
TE Connectivity India Pvt. Ltd.	Mfg. & Process Dvl. Engineer	Aug2023to Mar2025	Industrial
ILensys Technologies deputed @ThermoFisher Scientific	Tech Lead	Apr2022to Jul2023	Medical
TeamLease Deputed @ Quest Global	Project Lead	Jun2021 to Nov2021	Rail
Cyient Ltd	Sr.Technical Lead	Aug2015to Nov2020	
Rane Die cast Ltd	Engineering Manager	May2012to Jun2015	Automotive/Mfg.
Mahindra Satyam & Dell	Mechanical Engineer	Feb2008to May2012	Heavy Engineering
DRDO	Senior Technical Asst.	Jan2006to Jan2008	Aerospace/Defence
Pennar Industries Ltd	Tool Designer	Jan2001to May2005	Automotive/consumer

TE Connectivity India Private Ltd as Mfg. & Process development Engineer

- Responsible for the Mfg. & development of tools for stampings & Molded parts in Power distribution Products & connectors (MCB, CPB & DBL).
- Review of Manufacturability of Plastic, Machined & stamped parts and assembly.
- Development of Prototypes & testing.
- Resolving manufacturing & quality issues.
- Ownership for alternate Manufacturing process set up, Cycle time reduction & sustainable practices.
- Responsible for Line transfer & process validation

ILensys Technologies Deputed @ ThermoFisher Scientific as Tech Lead

- Worked for Medical Products like Incubator, Mass Spectrometer, HPLC & Bio safety Cabinet.
- Supported Vave projects-Tear down, bench Marking, FBD,FCW analysis, Idea generation, cost reduction & Prototype to test specifications
- Provide solutions to field issues.

Team Lease deputed @ Quest Global as Project Lead

- Worked for Alstom in Rail Domain.
- Worked on Exteriors, Interiors & Car Body.
- ECN/ECR BOM update. PDM change update

Cyient Ltd as Sr.Technical Lead

- Worked for Rail Domain Projects with Bombardier
- Responsibilities include requirement collection, concept generation and design reviews, System Requirements & analysis.
- Preparation of Engineering change proposal align the key stakeholders.
- Lead the complete DCR/ECR/ECO process for mechanical release the changes on time.
- Product defect management, field complaints investigation & closure.
- Worked on Interiors, Exteriors Car body.
- Floor Panels concepts, Underframe Structure, Roof Structure, End walls, Sidewalls, Cable Ducts, HVAC Module Brackets for Pneumatic lines and Ducts.
- Product Configuration, BOM creation and Modification in PDM.
- Model checking to identify the clash between the parts in the assemblies (DMU Analysis)
- Review of Manufacturing Drawings.
- Associate VPM drawing document to the product tree and then create part drawings, installation Drawings and weldment drawings.
- Creation/Revising of Article, Technical documents, ECO implementations, DRL submissions in PDM and Corresponding creation/updating/Modification of Technical documents in 3Dcom.

Rane Die cast Ltd as Engineering Manager

This is TS16949 certified TQM based company supplying High-Pressure die-casting (HPDC) parts to various automotive clients. This Company equipped with various automatic Die casting machines (Buhler, UBE), shot blasting, Impregnation, HMC (Brother), VMC (TAL Makino) & CMM.

- Product design review and manufacturing feasibility study
- Submission of RFQ and tooling cost estimation
- Review and approval of Design for Dies, machining Fixtures and gages.
- To ensure the dies are ready for production as per Production Plan on CNC machines.
- Coordinating with suppliers in the development of Dies and Fixtures on time.
- Submission of PPAP and APQP documents as per TS16949
- Preparation of Gantt Charts and tracking of activities for Vendors & Customers.
- Responsible for Engineering deliverables in line with Program schedule.
- Release of documents like PFMEA, Control plan, SOP, Process Flow.
- Keeping record of Engineering changes product specifications.
- Adhering to TQM Practice, updating on best practices, problem data bank & lessons learnt.
- Implementation of 5S, TPM, Kaizen & Quality Management systems.
- Co-ordinate Production as per AOP for Serial Production.
- Re-ordering plan for Dies development as per annual volume.
- Co-ordination for Product Tooling trials, Correction & Proving of Dies.
- Conducting CFT meetings to resolve Product and tooling related issues.
- Co-ordination with Materials Lab in testing for Chemical, Mechanical Microstructure.
- Vendor development for machining components.

Mahindra Satyam as Mechanical Engineer

Mahindra Satyam offering engineering services for Caterpillar in US a leading manufacturer in the earth moving equipment.

- Worked for Large Mining Truck-100T, Quarry construction truck, TTT Motor Grader.
- Worked in NPD, CPI projects & Industrial Design. (Aesthetics, Ergonomic, Safety & Sustainability factors)
- Worked in line with the requirement of Industrial, ergonomics, safety and regulatory compliant.
- Design from concept to release for manufacturing drawings.
- Simulation of Assembly and Mechanism of parts in working
- Worked on fixture design for various welding and machining fixtures in PRO-E
- Selection of equipment like Hydraulic cylinders and clamps.
- Coordinating with the analysis team in stress evaluation.

DRDO as Senior Technical Assistant

DRDL is the Research Laboratory which is responsible for design and development Defence Systems catering to the needs of Indian defense

- Dimensional inspection using CMM with PCDMIS Software.
- Design of airframes, bulkheads, Thrust nozzle & Mechanical Actuation systems
- Mechanical testing of Materials and Technical documentation
- Development of offline CMM programming through cad models.
- Design of fixtures for holding the job on the bed while inspection.
- Developed Products by Reverse engineering.
- Keeping Documents ready for Internal and External audit
- Material testing with NDT techniques like Penetration, Ultrasonic Magnetic Particle

Pennar Industries Ltd as Tool Designer

This company is engaged in the manufacturing of cold roll formed sections, steel strips & pressed components catering to the needs of various automotive and white good industries.

- Submission of RFQ Piece part Price to Marketing Dept.
- Feasibility study of Input Part Drawings with All Dimensions considered.
- Design of Cold rolling mills for various profiles.
- Design of Molds, Press tools, Fixtures, Roll Forming tools, cut-off Dies& gauges.
- Follow up in Tool room for Machining (Turning, Milling, Wire Cut EDM), Heat Treatment & Grinding.
- Follow up with QC (CMM) Tool room about the Stage inspection of Parts.
- Die Assembly & Trails
- Part Inspection and Die Corrections.
- Resolving Quality issues related to production tooling.

EDUCATION

- B Tech in Mechanical Engineering from JNT University, Hyderabad
- Post Diploma in Tool Design from Central Institute of Tool Design.
